Report of Independent Auditors

To the Trustees of the University of Pennsylvania:

Report on the Consolidated Financial Statements

We have audited the accompanying consolidated financial statements of the University of Pennsylvania (the "University"), which comprise the consolidated statements of financial position as of June 30, 2017 and 2016, and the related consolidated statements of activities and of cash flows for the years then ended and the related notes to the financial statements.

Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on the consolidated financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the University's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the University's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, based on our audits, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of the University of Pennsylvania as of June 30, 2017 and 2016, and the changes in their net assets and their cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Other Information

Our audit was conducted for the purpose of forming an opinion on the consolidated financial statements as a whole. The accompanying schedule of expenditures of federal awards for the year ended June 30, 2017 is presented for purposes of additional analysis as required by Title 2 U.S. *Code of Federal Relegations* Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance) and is not a required part of the consolidated financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the consolidated financial statements. The information has been subjected to the auditing procedures applied in the audit of the consolidated financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the consolidated financial statements or to the consolidated financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the schedule of expenditures of federal awards is fairly stated, in all material respects, in relation to the consolidated financial statements as a whole.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated September 29, 2017 on our consideration of the University's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements and other matters for the year ended June 30, 2017. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing and not to provide an opinion on the effectiveness of internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the University's internal control over financial reporting and compliance.

1. Significant Accounting Policies

Organization

The University of Pennsylvania (the University), located in Philadelphia, Pennsylvania, is an independent, nonsectarian, not-for-profit institution of higher learning founded in 1740. The University Academic Component (Academic Component) provides educational services, primarily for students at the undergraduate, graduate, professional and postdoctoral levels and performs research, training and other services under grants, contracts and similar agreements with sponsoring organizations, primarily departments and agencies of the United States Government. The University also operates an integrated health care delivery system, the University of Pennsylvania Health System (UPHS). The University is a tax-exempt organization under Section 501(c) (3) of the Internal Revenue Code.

Basis of Presentation

The consolidated financial statements have been prepared on the accrual basis of accounting and include the accounts of the University and its subsidiaries, over which the University has a controlling financial interest or exercises control. All material transactions between the University and its subsidiaries are eliminated in consolidation. Investments in subsidiaries over which the University has the ability to exercise significant influence are reported using the equity method of accounting. Other investments in subsidiaries are reported using the cost method of accounting.

The net assets of the University are classified and reported as follows:

<u>Unrestricted</u> - Net assets that are not subject to donor-imposed restrictions.

<u>Temporarily restricted</u> - Net assets that are subject to legal or donor-imposed restrictions that will be met by actions of the University and/or the passage of time. These net assets include gifts donated for specific purposes and appreciation on permanent endowment, which is restricted by Pennsylvania law on the amounts that may be expended in a given year.

<u>Permanently restricted</u> – The original value of donor restricted net assets, the use of which is limited to investment and can only be appropriated for expenditure by the University in accordance with the Pennsylvania Uniform Principal and Income Act (Pennsylvania Act).

Expenses are reported as a decrease in unrestricted net assets. Gains and losses on investments are reported as increases or decreases in unrestricted net assets unless their use is restricted by explicit donor stipulation or by law. Donor-restricted resources intended for the acquisition or construction of long-lived assets are initially reported as temporarily restricted net assets and released from restrictions from temporarily restricted net assets to unrestricted net assets when the asset is placed in service or in accordance with donor-specified terms.

Expirations of temporary restrictions on contributions and investment income, reported as Net assets released from restrictions, and the corresponding amounts are included in the Consolidated Statements of Activities as follows (in thousands):

Temporarily Restricted Net Assets	2017	2016
Net assets released from restrictions	\$ (416,050)	\$ (516,775)
Unrestricted Net Assets	2017	2016
Contributions and donor support	\$ 118,077	\$ 125,241
Investment income	263,140	241,766
Contributions and donor support for capital related activities	34,833	149,768
Net assets released from restrictions	\$ 416,050	\$ 516,775

Gains or losses associated with investment activities are included in Return on investments, net. Gains or losses associated with property, plant and equipment disposals are included in Other operating expenses. Gains or losses associated with all other activities, such as debt retirements and pension and postretirement plan actuarial valuation adjustments are reported in Pension, Other post-retirement employee benefits (OPEB) and other, net.

Certain prior period amounts have been reclassified to conform to the current year's presentation due primarily to the adoption, as of June 30, 2017, of the standard on Clarifying When a Not-for-Profit Entity That Is a General Partner or a Limited Partner Should Consolidate a For-Profit Limited Partnership or Similar Entity, issued by the Financial Accounting Standards Board (FASB) in January 2017. The standard allows not-for-profit entities that have elected the fair value option to deconsolidate investments in limited partnerships and similar entities and report them at fair value. The standard was applied retrospectively.

Fair Value

The University values certain financial and non-financial assets and liabilities by applying the FASB pronouncement on Fair Value Measurements. The pronouncement defines fair value and establishes a framework for measuring fair value that includes a hierarchy that categorizes and prioritizes the sources used to measure and disclose fair value. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price). The hierarchy is broken down into three levels based on inputs that market participants would use in valuing the asset or liability and are developed based on market data obtained from sources independent of the University as follows:

<u>Level 1</u>: Unadjusted quoted market prices in active markets for identical assets or liabilities.

<u>Level 2</u>: Unadjusted quoted prices in active markets for similar assets or liabilities, unadjusted quoted prices for identical or similar assets or liabilities in markets that are not active, or inputs other than quoted prices that are observable.

<u>Level 3</u>: Unobservable inputs for the asset or liability.

Inputs broadly refer to the assumptions that market participants use to make valuation decisions, including assumptions about risk. Inputs may include price information, volatility statistics, specific and broad credit data, liquidity statistics and other factors. The University is required by the pronouncement to maximize the use of observable inputs (Levels 1 and 2) and minimize the use of unobservable inputs (Level 3). The University considers observable data to be that market data which is readily available, regularly distributed or updated, reliable and verifiable, not proprietary and provided by independent sources that are actively involved in the relevant market. The categorization of a financial instrument within the hierarchy is based upon the pricing transparency of the instrument and does not necessarily correspond to the University's perceived risk of that instrument.

Assets and liabilities are disclosed in the Consolidated Notes to Financial Statements within the hierarchy based on the lowest (or least observable) input that is significant to the measurement. The University's assessment of the significance of an input requires judgment, which may affect the valuation and categorization within the fair value hierarchy. The fair value of assets and liabilities using Level 3 inputs are generally determined by using pricing models or discounted cash flow methods, which all require significant management judgment or estimation.

As a practical expedient, the University is permitted to estimate the fair value of an investment in an investment company at the measurement date using the reported net asset value (NAV). Adjustment is required if the University expects to sell the investment at a value other than NAV or if the NAV is not calculated in accordance with US generally accepted accounting principles (US GAAP). The University holds investments in its portfolio which are generally valued based on the most current NAV. This amount represents fair value of these investments at June 30, 2017 and 2016. Investments reported at NAV, as a practical expedient, are not included within levels 1, 2, or 3 in the fair value hierarchy.

The University performs additional procedures including due diligence reviews on its investments in investment companies and other procedures with respect to the capital account or NAV provided to ensure conformity with US GAAP. The University has assessed factors including, but not limited to, managers' compliance with the *Fair Value Measurement* standard, price transparency and valuation procedures in place.

Cash and Cash Equivalents

Cash equivalents include short-term, highly liquid investments and are carried at cost which approximates fair value. Unrestricted short-term investments available for current operations with maturities of three months or less when purchased are classified as cash equivalents.

Investments, at Fair Value

The majority of the University's investments are held in the Associated Investments Fund (AIF). The AIF is invested in accordance with the investment policies set out by an Investment Board which has been appointed by the Trustees of the University of Pennsylvania (the Trustees). The Office of Investments is responsible for the day-to-day management of the AIF including identifying, selecting and monitoring a variety of external investment managers to implement the strategic asset allocation set forth by the Investment Board. The AIF may include marketable and not readily marketable securities that it intends to hold for an indefinite period of time. The University also holds other investments which are not invested in the AIF due to various restrictions. The majority of these investments are in highly liquid short-term and equity type investments. Changes in the fair value of investments are reported in Return on investments, net in the Consolidated Statements of Activities. The following is a summary of the investments held in the AIF by asset allocation as well as investment risk:

Short-Term

Short-term investments include cash equivalents and fixed income investments with maturities of less than one year. Short-term investments are valued using observable market data and are categorized as Level 1 based on quoted market prices in active markets. The majority of these short-term investments are held in a US Treasury money market account.

Equity

Equity investments consist of direct holdings of public securities in managed accounts as well as exchange traded funds, commingled funds and limited partnerships. The securities held in managed accounts, along with exchange traded funds are generally valued based on quoted market prices in active markets obtained from exchange or dealer markets for identical assets, and are accordingly categorized as Level 1. Commingled funds and limited partnerships are valued at NAV.

Debt

Debt investments consist of direct holdings of securities in managed accounts and limited partnerships. Securities such as US Treasuries, held in managed accounts, are valued based on quoted market prices in active markets and are categorized as Level 1. Securities such as corporate bonds, high yield bonds and bank loans, also held in managed accounts, are valued based on quoted market prices or dealer or broker quotations and are categorized as Level 2 or in the cases where inputs are unobservable as Level 3. Limited partnership interests are valued at NAV.

Absolute Return

Absolute return investments are made up of allocations to limited partnerships. The fund managers of limited partnerships invest in a variety of securities, based on the strategy of the fund, which may or may not be quoted in an active market. Illiquid investments, if any, are generally designated as a side pocket by hedge fund managers and may be valued based on an appraised value, discounted cash flow, industry comparables or some other method. Limited partnership interests are valued at NAV.

Real Estate

Investments in real estate are primarily in the form of close-ended limited partnership interests. The fund managers of limited partnerships primarily invest in private investments for which there is no readily determinable market value. The fund manager may value the underlying private investments based on an appraised value, discounted cash flow, industry comparables or some other method. These limited partnership investments are valued at NAV. Real estate investments also include an open-ended real estate investment trust valued at NAV.

Private Equity

Investments in private equity are in the form of close-ended limited partnership interests. The fund managers of limited partnerships primarily invest in private investments for which there is no readily determinable market value. The fund manager may value the underlying private investments based on an appraised value, discounted cash flow, industry comparables or some other method. These limited partnership investments are valued at NAV.

Natural Resources

Investments in natural resources are made up of limited partnership interests and securities in managed accounts. The limited partnership fund managers primarily invest in private investments for which there is no readily determinable market value. The fund manager may value the underlying private investments based on an appraised value, discounted cash flow, industry comparables or some other method. These limited partnership investments are valued at NAV. The University directly holds the securities held in the managed accounts through a custodial relationship. The securities held in the managed accounts are generally valued based on quoted market prices in active markets obtained from exchange or dealer markets for identical assets, and are accordingly categorized as Level 1.

Derivatives

The University, in the normal course of business, utilizes derivative financial instruments in connection with its investment activity. Derivatives utilized by the University include futures, options, swaps and forward currency contracts and are reflected at fair value following the definition of Level 1 and 2 assets and liabilities as previously described. Investments in derivative contracts are subject to foreign exchange and equity price risks that can result in a loss of all or part of an investment. In addition, the University is also subject to additional counterparty risk should its counterparties fail to meet the terms of their contracts.

Investment Risks

The University's investing activities expose it to a variety of risks, including market, credit and liquidity risks and attempts to identify, measure and monitor risk through various mechanisms including risk management strategies and credit policies.

Market risk is the potential for changes in the fair value of the University's investment portfolio. Commonly used categories of market risk include currency risk (exposure to exchange rate differences between functional currency relative to other foreign currencies), interest rate risk (changes to prevailing interest rates or changes in expectations of futures rates) and price risk (changes in market value other than those related to currency or interest rate risk, including the use of NAV provided).

Credit risk is the risk that one party to a financial investment will cause a financial loss for the other party by failing to discharge an obligation (counterparty risk).

Liquidity risk is the risk that the University will not be able to meet its obligations associated with financial liabilities.

Endowment

The University's endowment consists of 6,126 donor-restricted permanent or term endowment funds and 881 unrestricted endowment funds established by management for a variety of purposes. The University reports all endowment investments at fair value. The majority of the endowment funds of the University have been pooled in the University's AIF, which is invested in equities, bonds, hedge funds, natural resources, private equity and real estate limited partnerships. The endowment funds not pooled in the AIF are primarily invested in equities and bonds.

The Commonwealth of Pennsylvania has not adopted the Uniform Management of Institutional Funds Act (UMIFA) or the Uniform Prudent Management of Institutional Funds Act (UPMIFA). Rather, the Pennsylvania Act governs the investment, use and management of the University's endowment funds.

The Pennsylvania Act does not require the preservation of the fair value of a donor's original gift as of the gift date of a donor-restricted endowment fund, absent explicit donor stipulations to the contrary. However, based on its interpretation of the Pennsylvania Act and relevant accounting literature, the University classifies as permanently restricted net assets for reporting purposes: (i) the original value of gifts donated to the permanent endowment; (ii) the original value of subsequent gifts to the permanent endowment; and (iii) accumulations to the permanent endowment made in accordance with the direction of the applicable donor gift instrument at the time the accumulation is added to the fund. The remaining portion of the donor-restricted endowment fund that is not classified in permanently restricted net assets is classified as temporarily restricted net assets until those amounts are appropriated for expenditure by the University. The Pennsylvania Act allows a nonprofit to elect to appropriate for expenditure between 2% and 7% of the endowment fair value, determined at least annually and averaged over a period of three or more preceding years.

In accordance with the Pennsylvania Act, the University has elected to adopt and follow an investment policy seeking a total return for the investments held by the AIF, whether the return is derived from appreciation of capital or earnings and distributions with respect to capital or both. The endowment spending policy which the Board of Trustees has elected to govern the expenditure of funds invested in the AIF is designed to manage annual spending levels and is independent of the cash yield and appreciation of investments for the year. For Fiscal Year 2017, the spending rule target payout was based on the sum of: (i) 70% of the prior fiscal year distribution adjusted by an inflation factor; and (ii) 30% of the prior fiscal year-end fair value of the AIF, lagged one year, multiplied by 5.3% for financial aid funds and 5.0% for all other funds. The payout or allocation to operations exceeded actual income, net of expenses and net of income permanently reinvested, by \$485,860,000 in 2017 and by \$365,366,000 in 2016.

Effective for Fiscal Year 2018, the University revised its spending rule formula to align the target spending rate for both the financial aid and non-financial aid endowments at 5.0%.

Property, Plant and Equipment

Property, plant and equipment ('PPE') is reported net of related depreciation. Donated PPE is reported based on estimated fair value at the date of acquisition. Capital leases are categorized as buildings or equipment and are reflected at the lower of the net present value of the minimum lease payments or the fair value of the leased asset at the inception of the lease. All other PPE is reported at cost. Depreciation is computed on the straight-line method over the estimated useful lives of the assets or the shorter of the lease term or estimated useful life of the asset for capital lease assets. Contributions of library materials as well as rare books and other collectibles, are not recorded for financial statement presentation, while purchases are recorded as Other operating expenses on the Consolidated Statement of Activities in the period acquired.

Split-Interest Agreements

The University's split-interest agreements with donors consist of irrevocable charitable remainder trusts, charitable gift annuities, pooled income funds, perpetual trusts and charitable lead trusts. Assets are invested and payments are made to donors and/or other beneficiaries in accordance with the respective agreements.

The University recognizes assets contributed to charitable remainder trusts, charitable gift annuities and pooled income funds, where it serves as trustee, at fair value, recognizes a liability to the beneficiaries based on the present value of the estimated future payments to beneficiaries to be made over the estimated remaining life of those beneficiaries using current market rates at the date of the contribution, and recognizes the difference as contribution revenue. Subsequently, the trust assets, invested in equity and debt securities, are measured at fair value at quoted market prices, and are categorized as Level 1, with the changes reported as an adjustment to Investments, at fair value on the Consolidated Statements of Financial Position and Return on investments, net on the Consolidated Statements of Activities. Liabilities to beneficiaries are revalued based on current market rates, and are categorized as Level 2, with the changes reported as an adjustment to Liabilities associated with investments on the Consolidated Statements of Financial Position and Return on investments, net on the Consolidated Statements of Financial Position and Return on investments, net on the Consolidated Statements of Activities.

Charitable remainder trust assets, where the University does not serve as trustee, are initially valued using the current fair value of the underlying assets, using observable market inputs based on its beneficial interest in the trust, discounted to a single present value using current market rates at the date of the contribution. The initially contributed assets are categorized as Level 3, and reported as Investments, at fair value on the Consolidated Statements of Financial Position and Contribution revenue on the Consolidated Statements of Activities. Subsequent valuation follows this same approach with changes in fair value reported as an adjustment to Investments, at fair value on the Consolidated Statements of Financial Position and Return on investments, net on the Consolidated Statements of Activities. The primary unobservable input used in the fair value measurement of the Charitable remainder trust assets is the discount rate. Significant fluctuation in the discount rates utilized in this calculation could result in a material change in fair value.

Perpetual trust assets are initially valued at the current fair value of the underlying assets using observable market inputs based on its beneficial interest in the trust. The initially contributed assets are categorized as Level 3 and are reported as Investments, at fair value on the Consolidated Statements of Financial Position and as Contribution revenue on the Consolidated Statements of Activities. Subsequent valuation follows this same approach with changes in fair value reported as an adjustment to Investments, at fair value on the Consolidated Statements of Financial Position and Return on investments, net on the Consolidated Statements of Activities. The primary unobservable inputs used in the fair value measurement of the perpetual trust assets are the underlying securities held by the trust. Significant fluctuation in the market value of these underlying securities could result in a material change in fair value.

The University reports charitable lead trust assets by discounting future cash flows using current market rates at the measurement date, matched to the payment period of the agreement. The initially contributed assets are categorized as Level 3, and reported as Investments, at fair value on the Consolidated Statements of Financial Position and as Contribution revenue on the Consolidated Statements of Activities. Subsequent valuation follows this same approach with changes in fair value reported as an adjustment to Investments, at fair value on the Consolidated Statements of Financial Position and Return on investments, net on the Consolidated Statements of Activities. The primary unobservable input used in the fair value measurement of the Charitable lead trust assets is the discount rate. Significant fluctuation in the discount rates utilized in this calculation could result in a material change in fair value.

Income Taxes

The University is a tax exempt organization under Section 501 (c) (3) of the Internal Revenue Code. Most of its activities and income are related to its exempt purposes and are exempt from federal and state income taxes. None of its activities and income is subject to Pennsylvania income tax. Unrelated activities and income, including certain sales of healthcare related products and services and certain sales of computer hardware and software, are subject to federal "Unrelated Business Income Tax."

The University regularly evaluates its tax position and does not believe it has any uncertain tax positions that require disclosure or adjustment to the consolidated financial statements.

Tuition and Fees

The University maintains a policy of offering qualified undergraduate applicants admission to the University without regard to financial circumstance. This policy provides financial aid to eligible students in the form of direct grants and employment during the academic year. The University maintains an aid program whereby any qualified undergraduate student with demonstrated financial need receives an aid package which predominantly includes grants and a work-study award. Students may still borrow at their discretion to supplement their aid packages. Tuition and fees have been reduced by certain grants and scholarships in the amount of \$333,582,000 in 2017 and \$322,367,000 in 2016.

Sponsored Programs

The University receives grant and contract revenue from governmental and private sources. In 2017 and 2016, grant and contract revenue earned from governmental sources totaled \$713,113,000 and \$696,148,000, respectively. The University generally recognizes revenue associated with the direct and the applicable indirect costs of sponsored programs as the related costs are incurred. The University negotiates its federal indirect rate with its cognizant federal agency. Indirect costs recovered on federally-sponsored programs are generally based on predetermined reimbursement rates which are stated as a percentage and distributed based on the modified total direct costs incurred. Indirect costs recovered on all other grants and contracts are based on rates negotiated with the respective sponsors. Funds received for sponsored research activity are subject to audit. Based upon information currently available, management believes that any liability resulting from such audits will not materially affect the financial position or operations of the University.

Contributions

Unrestricted Contributions and donor support includes net assets released as a result of corresponding expenditures which met donor imposed restrictions. Contributions, including unconditional promises to donate cash and other assets, are recognized as revenue in the period received and are reported as increases in the appropriate net asset category based on donor restrictions. Contributions designated for the acquisition of long-lived assets and long-term investment are reported in Nonoperating revenue, net gains, reclassifications and other.

The University reports unconditional pledges at fair value by discounting future cash flows using current market rates at the measurement date, ranging from 2.00% to 3.28%, matched to the payment period of the agreement, and accordingly categorizes these assets as Level 3. The primary unobservable input used in the fair value measurement of the University's Contributions receivable is the discount rate. Significant fluctuation in the discount rates utilized in this calculation could result in a material change.

Net Patient Service Revenue

Net patient service revenue is derived from UPHS patient services and is accounted for at established rates on the accrual basis in the period the service is provided. Patient service revenue is net of charity care and community services. Certain revenue received from third-party payors is subject to audit and retroactive adjustment. Any changes in estimates under these contracts are recorded in operations currently.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

Recent Authoritative Pronouncements

In May 2014, the FASB issued a standard on Revenue from Contracts with Customers. This standard implements a single framework for recognition of all revenue earned from customers. This framework ensures that entities appropriately

reflect the consideration to which they expect to be entitled in exchange for goods and services by allocating transaction price to identified performance obligations and recognizing revenue as performance obligations are satisfied. Qualitative and quantitative disclosures are required to enable users of financial statements to understand the nature, amount, timing, and uncertainty of revenue and cash flows arising from contracts with customers. The standard is effective for fiscal years beginning after December 15, 2017. University management is evaluating the impact this will have on the consolidated financial statements beginning in Fiscal Year 2019.

In August 2016, the FASB issued a standard on the Presentation of Financial Statements of Not-for-Profit Entities. The new guidance requires improved presentation and disclosures to help not-for-profits provide more relevant information about their resources to donors, grantors, creditors and other users. The standard is effective for fiscal years beginning after December 15, 2017. University management is evaluating the impact this will have on the consolidated financial statements beginning in Fiscal Year 2019.

In February 2016, the FASB issued a standard on Leases. This standard requires lessees to recognize assets and liabilities for the rights and obligations created by leases with terms in excess of 12 months. The recognition, measurement, and presentation of expenses and cash flows arising from a lease will primarily depend on its classification as a finance or operating lease. The accounting by lessors remains largely unchanged. This standard is effective for fiscal years beginning after December 15, 2018. University management is evaluating the impact this will have on the consolidated financial statements beginning in Fiscal Year 2020.

In March 2017, the FASB issued a standard on Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost. Presently, net benefit cost is reported as an employee cost within Increase in net assets from operations (or capitalized into assets when appropriate.) This standard requires the bifurcation of net benefit cost, as follows: service cost will continue to be reported in Compensation and benefits, while the remaining components of net benefit cost will be reported in Pension, OPEB and other, net. This standard is effective for fiscal years beginning after December 15, 2019. However, University management plans to early adopt this standard for Fiscal Year 2018 and estimates that the retrospective impact will result in an increase to Net assets from operations of \$45,798,000 for the year ended June 30, 2017.

2. University of Pennsylvania Health System - Summarized Financial and Related Information

The Trustees formed Penn Medicine, the governance structure which oversees the activities of UPHS and the University of Pennsylvania Perelman School of Medicine (PSOM). The governing body operates, oversees and coordinates the academic, research and clinical missions of Penn Medicine.

UPHS is comprised of the following operating entities: Clinical Practices of the University of Pennsylvania; Clinical Care Associates; Hospital of the University of Pennsylvania; Penn Presbyterian Medical Center; Pennsylvania Hospital of the University of Pennsylvania Health System; Chester County Hospital and Health System; Wissahickon Hospice of the University of Pennsylvania Health System; Franklin Casualty Insurance Company, a wholly owned Risk Retention Group; and, Quaker Insurance Company Ltd., a wholly owned offshore captive insurance company, (collectively referred to as RRG/Captive). In August 2015, through a membership substitution, Lancaster General Health (LGH) became a part of UPHS.

Throughout the year, certain transactions (primarily billings for allocations of common costs, physicians' salaries and benefits, certain purchased services and support for PSOM) are conducted between UPHS and the University. Nonoperating, net, as shown below, includes transfers from UPHS to the University of \$180,632,000 and \$159,055,000 in 2017 and 2016, respectively, to further the research and educational activities of PSOM and \$0 and \$1,748,000 in 2017 and 2016, respectively, for other activities. In addition, UPHS recognized operating expenses of \$19,351,000 and \$20,648,000 in 2017 and 2016, respectively, to support academic operating activities in the clinical departments of PSOM.

The effect of all these transactions is included in the following summarized financial information of UPHS as of and for the years ended June 30, 2017 and 2016 (in thousands):

		2017		2016
Net patient service revenue	\$	5,903,582	\$	5,545,187
Provision for bad debt		(193,651)		(218,621)

Net Patient Service Revenue

Net Patient Service Revenue ('NPSR'), net of contractual allowances and discounts, is as follows for the years ended June 30, 2017 and 2016 (in thousands):

	2017			2016
Third Party Payors	\$	5,798,498	\$	5,378,831
Self-Pay		105,084		166,356
Total All Payors	\$	5,903,582	\$	5,545,187

NPSR for the years ended June 30, 2017 and 2016 is derived from the following payors:

2017	2016
2017	2016
30%	30%
12%	11%
32%	29%
20%	23%
4%	4%
2%	3%
100%	100%
	12% 32% 20% 4% 2%

UPHS has agreements with the following third-party payors that provide for payments at amounts that differ from its established rates:

Inpatient acute care services and outpatient services rendered to Medicare program beneficiaries are paid at prospectively determined rates. These rates vary according to a patient classification system that is based on clinical, diagnostic, and other factors. Inpatient psychiatric services and medical education costs related to Medicare beneficiaries are paid based on a cost reimbursement methodology. UPHS is reimbursed for cost reimbursable items at a tentative rate with final settlement determined after submission of annual cost reports by each hospital and audits thereof by the Medicare fiscal intermediary.

Inpatient and outpatient services rendered to Medicaid program beneficiaries are paid at prospectively determined rates. Additional amounts are allocated to each hospital for training residents and serving a disproportionate indigent population.

Laws and regulations governing the Medicare and Medicaid programs are extremely complex and subject to interpretation. As a result, there is at least a reasonable possibility that recorded estimates will change by a material amount in the near term.

During 2017, UPHS and IBC reached agreement on terms of a five-year agreement. Payments made for inpatient services provided to IBC traditional and managed care subscribers are effected on a per case rate basis for most services. Payment for outpatient services is principally based upon negotiated fee schedules. Hospital and physician rates also provide for annual inflationary increases. In addition, incentives are paid for high performance with regard to clinical outcomes and patient quality. The agreement continues unless terminated by the parties.

During 2015, UPHS and Aetna reached agreement on terms of a new five-year agreement. The terms of the agreement provide payments for inpatient hospital services on a per case rate basis. Payments for outpatient services continue to be predominantly based upon negotiated fee schedules.

UPHS also has reimbursement agreements with certain commercial insurance carriers, health maintenance organizations and preferred provider organizations. The basis for reimbursement under these agreements includes prospectively determined rates per discharge, discounts from established charges and prospectively determined per diem rates.

Charity Care

UPHS provides services to patients, who meet certain criteria under its charity care policy, without charge or at amounts less than UPHS' established rates. Because UPHS does not pursue collections, such amounts have been excluded from NPSR. UPHS estimates the costs of providing charity care services based on data derived from a combination of UPHS' cost accounting system and the ratio of costs to charges. Of the Total expenses reported above by UPHS, an estimated \$16,134,000 and \$16,282,000 were incurred as a result of providing services to charity patients for the years ended June 30, 2017 and 2016, respectively.

Provision for Bad Debt

The provision for bad debt is based on management's assessment of expected net collections considering economic conditions, historical experience, trends in health care coverage and other collection indicators. Included in this assessment are patients who do not have health insurance or do not meet the criteria to qualify for UPHS' charity care policy. UPHS pursues collection of these amounts, however certain amounts are deemed to be uncollectible. Periodically throughout the year, management assesses the adequacy of the allowances for uncollectible accounts based upon historical write-off experience by payor category, including not covered by insurance, and history of cash collections. The results of this review are then used to make any modifications to the provision for bad debt to establish an appropriate allowance for uncollectible accounts. No significant modifications were made for Fiscal Years 2017 or 2016. After satisfaction of

amounts due from insurance and reasonable efforts to collect from patients have been exhausted, UPHS follows established guidelines for placing certain past-due patient balances with collection agencies, subject to terms of certain restrictions on collection efforts as determined by UPHS. Account receivables are written off after collection efforts have been followed in accordance with UPHS' policy. UPHS' allowances for uncollectible accounts totaled \$225,244,000 and \$220,700,000 at June 30, 2017 and 2016, respectively.

LGH Membership Substitution

Effective August 1, 2015, UPHS and LGH entered into an affiliation agreement whereby UPHS became the sole corporate member of LGH. LGH operates three hospitals in South Central Pennsylvania, including Lancaster General Hospital, a 533-bed general acute care hospital, Women & Babies Hospital, a 98-bed facility specializing in women's health and maternity services, and Lancaster Rehabilitation Hospital, a 59-bed rehabilitation hospital, as well as 14 outpatient centers, 3 urgent care sites, and a physician practice network with nearly 200 primary care and specialty practices at 40 practice sites.

No consideration was exchanged for the net assets contributed and costs are expensed as incurred. UPHS recorded non-operating contribution income of \$1,287,885,000 in fiscal year 2016 reflecting the fair value of the contributed net assets of LGH on August 1, 2015, of which, \$11,289,000 and \$12,729,000 were recorded in temporarily restricted and permanently restricted net assets, respectively.

Total fair value of assets, liabilities and net assets contributed by LGH and its subsidiaries at August 1, 2015 were as follows (in thousands):

	August 1, 2015		
Cash and cash equivalents	\$	97,307	
Patients accounts receivable, net		99,793	
Prepaid expenses and other current assets		56,839	
Assets limited as to use		160,855

Total liabilities and net assets	\$	1,984,574	

Definitive Agreement with Princeton HealthCare System

On December 13, 2016, UPHS signed a definitive agreement whereby Princeton Healthcare System ('PHS') will become part of UPHS. PHS is a comprehensive healthcare provider located in central New Jersey that principally includes the University Medical Center of Princeton, a general acute care hospital facility in Plainsboro, New Jersey, with 231 inpatient beds (plus 14 newborn bassinets), and Princeton House Behavioral Health, which includes a 110 bed inpatient facility in Princeton, New Jersey, and four additional outpatient locations. PHS includes approximately 1,200 physicians on staff

and employs approximately 3,200 people. In 2016, the PHS had approximately \$461 million in revenue. The agreement is contingent upon agreed upon closing conditions, including final approval by state and federal authorities.

No consideration will be exchanged for the net assets to be contributed. UPHS will record non-operating contribution income reflecting the fair value of the contributed net assets of PHS as of the date of the transaction. As of September 29, 2017, the fair value of the contributed net assets of PHS has not been finalized.

A summary of selected data from the audited financial statements of PHS for the years ended December 31, 2016 and 2015 is as follows (in thousands):

	2016			2015
Total operating revenue	\$	460,973	\$	437,331
Total operating expense		462,788		438,067
Operating loss	\$	(1,815)	\$	(736)
Nonoperating gain		10,992		7,734
Increase in unrestricted net assets	\$	9,177	\$	6,998

A summary of selected balance sheet data from the audited financial statements of PHS at book value is as follows (in thousands):

	December 31, 2016	December 31, 2015		
Total assets	\$ 748,740	\$ 746,847		
Total liabilities	429,407	435,533		
Total net assets	319,333	311,314		

The data presented above is based on historical information and does not reflect the impact, if any, of fair value adjustments, aligning accounting policies or other transaction related costs or impacts.

3. Accounts Receivable

The major components of receivables, net of allowances for doubtful accounts of \$17,980,000 and \$15,209,000 at June 30, 2017 and 2016, respectively, are as follows (in thousands):

	2017		
Sponsored research	\$ 137,675	\$ 123,735	
Malpractice	100,167	91,350	
Student	13,193	12,798	
Trade	53,272	44,318	
Investment income	4,032	3,843	
Other	79,873	47,743	
Total Accounts receivable	\$ 388,212	\$ 323,787	

Accounts receivable are reported at their net realizable value.

4. Loans Receivable

Loans receivable, and related allowances for doubtful accounts, consist of the following at June 30, 2017 and 2016 (in thousands):

|--|

	Red	ceivable	All	owance	Net
Student Loans:					
Federally-sponsored	\$	67,221			\$ 67,221
Other		15,847	\$	2,936	12,911
Total Student loans	\$	83,068	\$	2,936	\$ 80,132
Other		11,136		231	10,905
Total	\$	94,204	\$	3,167	\$ 91,037

2016

	Re	ceivable	All	owance	Net
Student Loans:					
Federally-sponsored	\$	72,836			\$ 72,836
Other		17,612	\$	3,803	13,809
Total Student loans	\$	90,448	\$	3,803	\$ 86,645
Other		11,247		229	11,018
Total	\$	101,695	\$	4,032	\$ 97,663

Loans receivable primarily consists of student loans. Student loans include federally-sponsored student loans and donor-restricted student loans with mandated interest rates and repayment terms. The federally-sponsored student loans represent amounts due from current and former students under various Federal Government funded loan programs, including Perkins and other health professional programs offered to graduate and undergraduate students. Loans disbursed under these programs are able to be assigned to the Federal Government upon default by the borrower, and therefore, no related allowance is considered necessary. Funding received under these programs is ultimately refundable to the Federal Government in the event the University no longer participates and accordingly is reported as a liability in Federal student loan advances in the Consolidated Statements of Financial Position. Determination of the fair value of student loans receivable is not practicable.

Loans receivable are reported at their net realizable value. The University regularly assesses the adequacy of the allowances for credit losses of its loans by performing ongoing evaluations, including such factors as aging, differing economic risks associated with each loan category, financial condition of specific borrowers, economic environment in which the borrowers operate, level of delinquent loans, value of collateral and existence of guarantees or indemnifications.

5. Contributions Receivable

A summary of contributions receivable at June 30, 2017 and 2016, is as follows (in thousands):

	2017	2016	
Unconditional promises expected to be collected in:			
Less than one year	\$ 108,885	\$	118,920
One year to five years	144,626		134,532
Over five years	36,588		38,853
	290,099		292,305
Less: Discount	(17,187)		(16,107)
Less: Allowances for doubtful amounts	(31,560)		(33,349)
Total Contributions receivable, net	\$ 241,352	\$	242,849

At June 30, 2017 and 2016, the University has outstanding unrecorded conditional promises to give, including non-legally binding bequests, of \$303,926,000 and \$300,919,000, respectively. When they become unconditional promises to give or are received in cash, they will be recorded and generally will be restricted for operations, endowment and capital projects as stipulated by the donors.

6. Investments, at Fair Value

A summary of investments, including the AIF, measured at fair value in accordance with the *Fair Value Measurements* standard, as of June 30, 2017 and June 30, 2016 is as follows (in thousands):

				Inv	estments at	
Assets	Level 1	Level 2	Level 3		NAV	2017

Other				2,539			2,539
Total assets	\$	3,606,534	\$ 249,811	\$ 411,281	\$	7,994,017	\$ 12,261,643

Included in Short-term investments is \$19,440,000 and \$59,386,000 of amounts held by trustees under indenture and escrow agreements at June 30, 2017 and 2016, respectively.

At June 30, 2017 and 2016, Short-term investments include \$59,705,000 and \$39,905,000, respectively, of outstanding receivables from trading activities. At June 30, 2017 and 2016, Short-term investments include \$44,196,000 and \$145,893,000, respectively, of outstanding payables from trading activities.

As of June 30, 2017 and 2016 there were no transfers between Level 1 and 2.

Liabilities related to equity short positions of \$197,681,000 and \$94,462,000 at June 30, 2017 and 2016, respectively, are reported in Accrued expenses and other liabilities on the Consolidated Statements of Financial Position. These liabilities are valued using observable market data and are categorized as Level 1 based on quoted market prices in active markets.

The University has made investments in various long-lived partnerships and, in other cases, has entered into contractual agreements that may limit its ability to initiate redemptions due to notice periods, lock-ups and gates. The University has also made commitments to various limited partnerships. The University expects these funds to be called over the next 5 years. The total amount of unfunded commitments is \$2,868,015,000 which represents 26.2% of the AIF value as of June 30, 2017.

Details on the fair value, remaining estimated life, outstanding commitments, current redemption terms and restrictions by strategy and type of investment are provided below (in thousands):

Included in Level 1 Split-interest agreement investments above are readily marketable assets invested by the University separately from the AIF where the University serves as trustee with an aggregate fair value of \$74,469,000 and \$71,722,000 at June 30, 2017 and 2016, respectively. Level 3 Split-interest agreement investments are managed and invested outside of the University by external trustees.

Invested in the AIF with an aggregate fair value of \$155,291,000 and \$141,294,000 at June 30, 2017 and 2016, respectively, is a perpetual trust managed by an external trustee who has delegated investment decisions to the University. The University invests the assets of this trust in accordance with its Endowment Policy.

Included in Split-interest agreements are amounts held to meet legally mandated annuity reserves of \$28,532,000 and \$29,815,000 as of June 30, 2017 and 2016, respectively, as required by the laws of the following states where certain individual donors reside: California, New Jersey and New York.

A summary of Level 3 assets included in Split-interest agreements, where the University is not trustee, measured at fair value, as of June 30, 2017 and 2016 is as follows (in thousands):

	2017	2016	
Charitable remainder trusts	\$ 15,991	\$	11,113
Charitable lead trusts	92,590		113,449
Perpetual trusts	287,448		275,483
Total	\$ 396,029	\$	400,045

Changes to the reported amounts of Split-interest agreements measured at fair value using unobservable (Level 3) inputs as of June 30, 2017 and 2016 are as follows (in thousands):

Charitable

	emainder Trusts	Charitable Lead Trusts	Perpetual Trusts	Total

Swaps									
Total	\$	(49,117)	\$	2,650	\$	7,976	\$	(67,521)	

The following tables set forth the fair value, related gains (losses) and notional amounts of the University's derivative

	2016								
		otional Amount	De	Gross rivative Assets	Dei	Gross rivative bilities		rivative Gains	
Foreign currency contracts	\$	63,747	\$	2,555	\$	637	\$	2,245	
Futures contracts		(142,605)				361		21,592	
Swaps								2,558	
Total	\$	(78,858)	\$	2,555	\$	998	\$	26,395	

The notional amount is representative of the volume and activity of the respective derivative type during the years ended June 30, 2017 and 2016.

Gross derivatives assets and liabilities are shown in Investments, at fair value and Accrued expenses and other liabilities on the Consolidated Statements of Financial Position, respectively. Derivative gains (losses) are shown in Return on investments, net on the Consolidated Statements of Activities, in the appropriate net asset classification.

A summary of the University's total investment return for the years ended June 30, 2017 and 2016 is presented below (in thousands):

	2017	2016
AIF investment income	\$ 80,745	\$ 52,748
AIF realized and unrealized gains (losses)	1,294,544	(171,975)
Return on AIF	1,375,289	(119,227)
Other investment gains (losses)	137,256	(7,628)
Total Return on investments	\$ 1,512,545	\$ (126,855)

7. Endowment

The composition and changes to the amount of the University's endowment at June 30, 2017 are as follows (in thousands):

	Unrestricted	Temporarily Restricted	ermanently Restricted	Total
	Onicstricted	Restricted	Restricted	Iotai
Donor-restricted endowment funds		\$ 2,641,506	\$ 3,640,350	\$ 6,281,856

Net assets, June 30, 2016	\$	5,161,319	\$	2,143,305	\$	3,410,740	\$	10,715,364

The fair value of certain permanently restricted endowment funds is less than the original donated value by \$81,000 and \$6,106,000 as of June 30, 2017 and 2016, respectively, and is reflected as a reduction of Temporarily restricted assets.

8. Property, Plant and Equipment, net

The components of PPE at June 30, 2017 and 2016 are as follows (in thousands):

Estimated	Useful
-----------	--------

	Life in years	2017	2016
Land and land improvements	N/A to 20	\$ 366,960	\$ 369,758
Buildings and fixed equipment	5 to 50	8,426,732	8,129,199
Moveable equipment and other	4 to 20	1,942,076	2,202,886
Construction-in-progress		590,926	653,532
		11,326,694	11,355,375
Less: Accumulated depreciation		(4,874,388)	(5,152,468)
Property, plant and equipment, net		\$ 6,452,306	\$ 6,202,907

The University recorded \$470,716,000 and \$451,227,000 of depreciation expense for the years ended June 30, 2017 and 2016, respectively.

Effective July 1, 2016, the University elected to revise its policy to expense library materials. Previously capitalized library materials were expensed. As a result, library materials amount to \$0 and \$86,260,000 at June 30, 2017 and 2016, respectively.

The University capitalized \$11,272,000 and \$12,008,000 of interest costs for the years ended June 30, 2017 and 2016, respectively.

The University has conditional asset retirement obligations of \$23,332,000 and \$21,646,000 as of June 30, 2017 and 2016, respectively, which primarily relate to asbestos contained in buildings and underground steam distribution piping and are included within Accrued expenses and other liabilities in the Consolidated Statements of Financial Position.

9. Split-Interest Agreements

Changes in the value of assets, liabilities and net assets pursuant to split-interest agreements as of June 30, 2017 and 2016 are as follows (in thousands):

2017	Assets	Liabilities	Net Assets
June 30, 2016	\$ 471,768 \$	(47,424) \$	424,344
New contributions	9,647	(2,403)	7,244
Investment income	1,556	(1,470)	86

June 30, 2017	\$ 470,498 \$	(47,511) \$	422,987

2016	Assets	Liabilities	Net Assets
June 30, 2015	\$ 491,021 \$	(44,799) \$	446,222
New contributions	9,761	(1,756)	8,005
Investment income	1,346	(1,147)	199
Realized and unrealized loss, net	(1,784)		(1,784)
Payments and settlements	(28,576)	7,399	(21,177)
Actuarial adjustment		(7,121)	(7,121)
Net change	(19,253)	(2,625)	(21,878)
June 30, 2016	\$ 471,768 \$	(47,424) \$	424,344

10. Medical Professional Liability Claims

The University is insured for medical professional liability claims through the combination of the Medical Care Availability and Reduction of Error Fund (Mcare, formerly, the Medical Professional Liability Catastrophe Loss Fund of the Commonwealth of Pennsylvania -- CAT Fund), various commercial insurance companies and risk retention programs.

Mcare levies health care provider surcharges, as a percentage of the Pennsylvania Joint Underwriters Association rates for basic coverage, to pay claims and pay administrative expenses of Mcare participants. These surcharges are recognized as expenses in the period incurred. Mcare operates on a pay-as-you-go basis and no provision has been made for any future Mcare assessments in the accompanying financial statements, as the University's portion of the unfunded Mcare liability cannot be estimated.

Anticipated insurance recoveries and estimated liabilities for medical malpractice claims or similar contingent liabilities are presented separately on the Consolidated Statement of Financial Position in Accounts receivable, net of allowances and Accrued expenses and other liabilities, respectively. The University accrues for estimated risks arising from both asserted and unasserted medical professional liability claims. The estimate of the gross liability and corresponding receivable for unasserted claims arising from unreported incidents is based on analysis of historical claims data by an independent actuary, which is recorded utilizing a 2.25% to 3.50% discount rate as of June 30, 2017 and 2016. The gross liability recorded under this program is \$714,363,000 and \$677,538,000 at June 30, 2017 and 2016, respectively, with a corresponding receivable of \$100,167,000 and \$91,350,000 at June 30, 2017 and 2016, respectively.

11. Contingencies, Guarantees and Commitments

The University offers various loan programs for students and families to pay tuition, fees and other costs. Certain loans issued by private lending institutions are guaranteed by the University totaling \$49,410,000 and \$64,992,000 at June 30, 2017 and 2016, respectively. Upon default by the borrower, the University is required to pay all or a portion of the outstanding loan balance. The University recognizes a liability for the greater of the fair value of the guarantee or defaults in the portfolio of guaranteed loans. The recognized liability is \$3,666,000 and \$6,193,000 at June 30, 2017 and 2016, respectively. These recognized liabilities reflect effective default reserve rates of 45.7% and 39.3% at June 30, 2017 and 2016, respectively.

Various lawsuits, claims and other contingent liabilities arise in the ordinary course of the University's education and health care activities. Based upon information currently available, management believes that any liability resulting therefrom will not materially affect the financial position or operations of the University.

The University is currently involved in various projects that have resulted in capital and property acquisition commitments from the University. As of June 30, 2017, approximately \$344,450,000 has been committed by the University.

12. Pension and Other Postretirement Benefit Costs

Retirement benefits are principally provided to employees through contributory defined contribution plans. The Academic Component's policy with respect to its contribution is to provide up to 9% of eligible employees' salaries, while the UPHS contribution can be up to 6.5%. The University's contributions to these plans amounted to \$176,023,000 and \$159,857,000 as of June 30, 2017 and 2016, respectively.

The University also has non-contributory defined benefit pension plans. Benefits under the plans generally are based on the employee's years of service and compensation during the years preceding retirement. Contributions to the plans are made in amounts necessary to at least satisfy the minimum required contributions as specified in the Internal Revenue Service Code and related regulations. The Academic Component's plan was frozen to new full-time entrants effective July 1, 2000. UPHS' non-LGH plan was frozen to new entrants effective July 1, 2010; the benefit accruals for all participants of the LGH plan were frozen effective June 30, 2013.

Additionally, the University provides certain healthcare and life insurance benefits (Other Postretirement Employee Benefits or OPEB) for retired employees. Only a limited number of employees may become eligible for such benefits if they reach retirement age while working for the University. These and similar benefits for active and certain retired employees are provided through insurance contracts.

The University uses a measurement date of June 30 for its defined benefit pension and OPEB plans.

Change in Plan Assets/ Obligation and Funded Status

Other retirement programs

Accrued retirement benefits

The funded status of the plans is measured as the difference between the plan assets at fair value and the projected benefit obligation (PBO) for Pension Benefits or accumulated postretirement benefit obligation (APBO) for Other Postretirement Benefits. The resulting net liability is recorded in Accrued retirement benefits on the Statements of Financial Position. The following shows changes in the benefit obligation, plan assets and funded status (in thousands):

	Po			Total	
\$	2,082,315	\$	379,925	\$	2,462,240

Amortization of prior service credit	\$ -	\$	(323)
Amortization of net losses	40.078		5.972

Actuarial Assumptions

The expected long-term rate of return on plan assets is management's best estimate of the average investment return expected to be received on the assets invested in the plan over the benefit period. The expected long-term rate of return on plan assets has been established by considering historical and future expected returns of the asset classes invested in by the pension trust, and the allocation strategy currently in place among those classes.

	Pensio	n Benefits	Other Postret	irement Benefits
Weighted-Average Assumptions Used to				
Determine Benefit Obligations at Year End	2017	2016	2017	2016
Discount rate	4.19%	4.17%	4.00%	3.95%
Salary increase	2.91%	3.94%	N/A	N/A
Weighted-Average Assumptions Used to				
Determine Net Periodic Benefit Cost				
Discount rate	4.23%	4.53%	3.95%	4.45%
Expected long-term return on plan assets	7.52%	7.50%	7.50%	7.50%
Salary increase	3.82%	3.94%	N/A	N/A
Assumed Health Care Cost Trend Rates				
Initial trend rate	N/A	N/A	6.54%	5.51%

Fiscal year end that ultimate trend rate is reached	N/A	N/A	2037	2023

Assumed health care cost trend rates have a significant effect on the amounts reported for the Other postretirement benefits. A one-percentage-point change in assumed health care trend rates would have the following effects on Other postretirement benefits (in thousands):

	1-P	ercentage	1-1	Percentage
	Poir	nt Increase	Poi	nt Decrease
2017				
Effect on total of service and interest cost	\$	14,607	\$	(10,999)
Effect on APBO		170,709		(133,252)

Plan Assets

The principal investment objectives for the pension and other postretirement benefits plans are to ensure the availability of funds to pay pension benefits as they become due under a broad range of future economic scenarios, to maximize long-term investment returns with an acceptable level of risk based on the pension obligations, and to invest the pension trust in a diversified manner.

The University's Office of Investments is responsible for the day-to-day management of the investments of the pension and other postretirement benefits. The investments are made in accordance with policies set out by the Investment Board which has been appointed by the Trustees. The pension and other postretirement benefit investments are similar in nature to those investments discussed in Notes 1 and 6 – Investments, at Fair Value. However, the actual allocations to specific investments within each asset class may vary due to certain restrictions imposed by investment managers and ERISA regulations.

A summary of plan assets, measured at fair value, as of June 30, 2017 and 2016, is as follows (in thousands):

⁽a) Present value of future lease payments

The University has letters of credit with various financial institutions to secure certain self-insured liabilities in the amount of \$8,081,000 and \$21,925,000 at June 30, 2017 and 2016, respectively. These letters of credit have evergreen provisions for automatic renewal. There have been no draws under these letters of credit.

Academic Component

On January 19, 2017, Pennsylvania Higher Educational Facilities Authority (PHEFA) issued Series A of 2017 revenue bonds (PHEFA 2017A bonds) with an aggregate principal amount of \$178,395,000. The proceeds were used to fund or reimburse the University for the cost of various capital projects. Interest on the PHEFA 2017A bonds is fixed with coupons ranging between 4.00% to 5.00%.

On April 28, 2016, PHEFA issued Series A of 2016 refunding revenue bonds (PHEFA 2016A bonds) with an aggregate principal amount of \$169,635,000. The proceeds were used to fund an escrow which will be used to refund \$7,600,000 from the PHEFA Series B of 2009 revenue bonds, \$33,110,000 from PHEFA Series of 2010 revenue bonds and \$117,310,000 from PHEFA Series A of 2011 revenue bonds. The refunded bonds were legally defeased, and as such, are no longer included among the University's reported liabilities. Interest on the PHEFA 2016A bonds is fixed with coupons ranging between 2.25% and 5.25%.

As a result of the legal defeasance of debt associated with the issuance of PHEFA 2016A bonds, the University reported a loss on early extinguishment of debt in Pension, OPEB and other, net on the Consolidated Statements of Activities in the amount of \$24,556,000 for the year ended June 30, 2016.

The University has variable rate debt in the amount of \$59,900,000 which is subject to optional tender by the holders upon seven days' notice. These bonds are reflected in the table above based on original scheduled maturities. In the event that the University receives notice of any optional tender on its variable rate demand bonds, the purchase price will be repaid from the remarketing of the bonds. However, in the event that the entire remarketing effort were to fail, the University would have the general obligation to purchase the bonds.

On June 14, 2016, the University entered into a five year agreement with a financial institution, whereby the institution has agreed to provide a line of credit in the amount of \$100,000,000 for general purposes of the University. The University pays a fee annually on the unused amount of the line of credit. As of June 30, 2017, there have been no draws under the agreement.

Consolidated Notes to Financial Statements

UPHS

The Lancaster County Hospital Authority (LCHA) Revenue Bonds and PHEFA Revenue Bonds are secured by master notes issued under the UPHS Master Trust Indenture (MTI). The MTI and related agreements contain certain restrictive covenants which limit the issuance of additional indebtedness, and among other things, require UPHS to meet an annual debt service coverage requirement of "income available for debt service" (excess of revenue over expenses plus depreciation, amortization, interest expense and extraordinary items) at an amount equal to 110% of the annual debt service requirements. If the coverage requirement for a particular year is not met, within six months of the close of that fiscal year, UPHS must retain the services of a consultant to make recommendations to improve the coverage requirement. UPHS must also implement the recommendations of the consultant to the extent that they can be feasibly implemented. UPHS will not be considered to be in default of the provisions of the MTI so long as UPHS has sufficient cash flow to pay total operating expenses and debt service for the fiscal year. In both 2017 and 2016, UPHS met its debt service coverage requirement under the MTI. Additionally, UPHS has pledged its gross revenues to secure its obligation under the MTI.

On August 25, 2016, PHEFA issued Series C of 2016 Health System refunding revenue bonds (PHEFA UPHS 2016C bonds) with an aggregate principal amount of \$129,290,000. The proceeds were used to fund an escrow which will be used to refund \$123,400,000 from PHEFA UPHS Series A of 2011 bonds. The refunded PHEFA UPHS Series A of 2011 bonds were legally defeased, and as such, are no longer included among UPHS's reported liabilities. Interest on the PHEFA UPHS 2016C bonds is fixed with coupons ranging between 2.00% to 5.00%.

As a result of the legal defeasance of debt associated with the issuance of PHEFA UPHS 2016C bonds, UPHS reported a loss on early extinguishment of debt in Pension, OPEB and other, net on the Consolidated Statements of Activities in the amount of \$27,947,000 for the year ended June 30, 2017.

On April 7, 2016, LCHA issued Series A of 2016 Health System revenue bonds (LCHA UPHS 2016A bonds) with an aggregate principal amount of \$173,310,000. The proceeds were used to fund an escrow which will be used to refund \$33,450,000 from LCHA Lancaster General Hospital (LGH) Series A of 2007 bonds and \$82,510,000 from LCHA LGH Series B of 2012 bonds. In addition to the refunding, the bonds provided \$65,890,000 proceeds used to fund or reimburse UPHS for the cost of various capital projects. The refunded LCHA LGH Series A of 2007 and LCHA LGH Series B of 2012 bonds were legally defeased, and as such, are no longer included among UPHS's reported liabilities. Interest on the LCHA UPHS 2016A bonds is fixed with coupons ranging between 3.00% to 5.00%.

On April 7, 2016, LCHA issued Series B of 2016 Health System revenue bonds (LCHA UPHS 2016B bonds) with an aggregate principal amount of \$128,050,000. The proceeds were used to fund an escrow which will be used to refund \$30,465,000 from PHEFA UPHS Series A of 2009 bonds and \$26,600,000 from PHEFA UPHS Series A of 2011 bonds. In addition to the refunding, the bonds provided \$81,110,000 proceeds used to fund or reimburse UPHS for the cost of various capital projects. The refunded PHEFA UPHS Series A of 2009 and PHEFA UPHS Series A of 2011 bonds were legally defeased, and as such, are no longer included among UPHS's reported liabilities. Interest on the LCHA UPHS 2016B bonds is fixed with coupons ranging from 4.00% to 5.00%.

As a result of the legal defeasance of debt associated with the issuance of LCHA UPHS 2016A and 2016B bonds, UPHS reported a loss on early extinguishment of debt in Pension, OPEB and other, net on the Consolidated Statements of Activities in the amount of \$22,366,000 for the year ended June 30, 2016.

UPHS has variable rate debt in the amount of \$69,995,000 which is subject to optional tender by the holders upon seven days' notice. These bonds are reflected in the debt obligations maturity table above based on original scheduled maturities. In the event that UPHS receives notice of any optional tender on its variable rate demand bonds, the purchase price will be repaid from the remarketing of the bonds. However, in the event that the entire remarketing effort were to fail, UPHS has in place a renewable direct pay letter of credit issued by Bank of America with an expiration date of April

15, 2018. In the event that the letter of credit cannot be drawn upon, UPHS would have the general obligation to purchase the bonds.

On April 13, 2016, UPHS entered into a three year agreement with a financial institution, whereby the institution has agreed to provide a line of credit in the amount of \$100,000,000 for general purposes of UPHS. UPHS pays a fee annually on the unused amount of the line of credit. As of June 30, 2017, there have been no draws under the agreement.

Interest Rate Swap Agreements

The University enters into interest rate swap agreements to synthetically modify the interest rate terms of its long term debt portfolio. These agreements are not entered into for trading or speculative purposes. Fair value of these agreements is determined by obtaining quotes from Goldman Sachs Mitsui Marine Derivative Products, L.P. (GSMMDP) and Merrill Lynch, respectively, which are based on the income approach, using observable market data to discount future net payment streams and accordingly considers this to be a Level 2 measurement. The quotes provided also represent the amount the University would accept or be required to pay to transfer the agreement to GSMMDP and Merrill Lynch, respectively, or exit price as defined by the Fair Value Measurements standard. The University also takes into account the risk of nonperformance.

The following table summarizes the terms of the University's interest rate swap agreements (in thousands):

		Academic omponent		UPI	HS		
Notional Amounts	\$	101,950	\$ 23,375	\$ 69,995	\$	24,800	\$ 24,800
Trade Date		11/6/2007	6/28/2006	10/24/2007		7/15/2009	1/7/2010
Maturity Date		7/1/2034	7/1/2041	1/1/2038		8/15/2023	8/15/2023
Rates: Receive	6	7% of 1-Month	70% of 1-month	67% of 1-Month		3.184%	2.902%
Day						SIEMA index	SIEM A index
Pay		LIBOR 3.573%	LIBOR 3.980%	LIBOR 3.755%		SIFMA index	SIFMA index

The following tables summarize the fair value of the interest rate swap agreements, not designated as hedging instruments, as of June 30, 2017 and 2016, and the related gains and (losses) on the interest rate swap agreements, both realized and unrealized, for the years ended June 30, 2017 and 2016 (in thousands):

Consolidated Statements of Position	Line Item	2017	2016
Asset interest rate swaps

Total Asset interest rate swaps		\$ 2,635	\$ 4,844
Liability interest rate swaps			
Academic Component	Accrued expenses and other liabilities	\$ 21,929	\$ 31,491
UPHS	Accrued expenses and other liabilities	7,524	12,694
Total Liability interest rate swaps		\$ 29,453	\$ 44,185
Consolidated Statements of Activities	Line Item	2017	2016
Academic Component	Return on investments, net	\$ 6,424	\$ (11,986)
UPHS	Return on investments, net	(767)	673
Total		\$ 5,657	\$ (11,313)

14. Net Assets

The major components of net assets at June 30, 2017 and 2016 are as follows (in thousands):

2017	Unrestricted	Temporarily restricted	Permanently restricted	Total
General operating	\$ 3,482,264	\$ 267,246		\$ 3,749,510
Sponsored programs	42,749			42,749
Capital		84,411		84,411
Student loans	10,174	1,291	\$ 17,152	28,617
Planned giving agreements		113,599	15,340	128,939
Endowment	5,931,351	2,641,506	3,640,350	12,213,207
Total	\$ 9,466,538	\$ 3,108,053	\$ 3,672,842	\$ 16,247,433

2016	Unrestricted	Temporarily restricted	Permanently restricted	Total
General operating	\$ 3,226,035	\$ 264,047		\$ 3,490,082
Sponsored programs	49,838			49,838
Capital		86,959		86,959
Student loans	10,277		\$ 16,933	27,210
Planned giving agreements		135,418	7,718	143,136
Endowment	 5,161,319	2,143,305	3,410,740	10,715,364
Total	\$ 8,447,469	\$ 2,629,729	\$ 3,435,391	\$ 14,512,589

15. Operating Leases

The University leases research labs, office space and equipment under operating leases expiring through December 2037. Rental expense for the years ended June 30, 2017 and 2016 totaling \$99,417,000 and \$93,903,000, respectively, is included in the accompanying Consolidated Statements of Activities.

At June 30, 2017, future minimum lease payments under existing operating leases were as follows (in thousands):

2018	\$ 87,429
2019	70,506
2020	63,157
2021	55,978
2022	49,070
Thereafter	 341,301
Total Minimum lease payments	\$ 667,441

16. Functional Classification of Expenditures

Expenses for the years ended June 30, 2017 and 2016 are categorized on a functional basis as follows (in thousands):

						2017						2016
		mpensation id benefits		preciation and amortization		Interest on indebtedness	o	ther operating expense		Total		Total
Instruction	\$	860,218	\$	62,800	\$	4,613	\$	412,755	\$	1,340,386	s	1,253,965
Research	Ф	417,924	Þ	41,467	Ф	21,551	Ф	321,347	Ф	802,289	Ф	746,560
Hospital and physician												
practices		3,303,965		277,961		48,337		2,137,650		5,767,913		5,269,391
Auxiliary enterprises		35,550		32,265		4,120		88,930		160,865		141,315
Other educational activities		132,497		14,511		750		37,046		184,804		196,844
Student services		55,849		-		145		43,067		99,061		86,629
Academic support		39,395		16,407		321		124,235		180,358		81,013
Management and general		233,063		20,182		405		35,297		288,947		294,230
Independent operations		7,785		5,500		179		58,642		72,106		70,040
Total	\$	5,086,246	\$	471,093	\$	80,421	\$	3,258,969	\$	8,896,729	\$	8,139,987

Operation and maintenance of PPE and depreciation are allocated to functional classifications based on square footage. Interest expense is allocated to the functional classifications of the activity that directly benefited from the proceeds of the debt.

17. Subsequent Events

The University has evaluated subsequent events for the period from June 30, 2017 through September 29, 2017, the date the consolidated financial statements were issued.

Engineering and visualizing genome folding at high spatiotemporal resolution	93.838		1-U01-HL-129998-01	332,791	866,949		866,949
Epigenetic regulation of lung progenitor repair and regeneration	93.838		1-U01-HL-110942-01	212,918	469,274		469,274
Estrogen signaling in portopulmonary hypertension	93.838		1-R01-HL-113988-01	-239	-1,197		-1,197
Estrogen signaling in portopulmonary hypertension	93.838		4-R01-HL-113988-05	196,794	701,715		701,715
Function of the IncRNA transcriptome in lung development and regeneration	93.838		1-R01-HL-122993-01A1		889,085		889,085
Genetic Investigation of pulmonary lymphatic development and function	93.838		1-R01-HL-120872-01A1	26,652	533,690		533,690
GRADS Clinical Center: Studies in Sarcoidosis and Microbiomics Research	93.838		1-U01-HL-112712-01		-1		-1
Human Respiratory Tract Microbiome in Health, HIV Infection and HIV Lung Disease	93.838		1-U01-HL-098957-01		-44		-44
ICAM-1 targeted thrombomodulin: an experimental therapeutic for the Acute Respiratory Distress Syndrome	93.838		1-K08-HL-130430-01A1		100,615		100,615
iCOMPARE—DCC	93.838	JOHNS HOPKINS UNIVERSITY	2002773100			7,666	7,666
Imaging-based characterization of the COPDGene cohort	93.838		1 R01 HL127969-01A1		633,838		633,838
Investigating the function and mechanism of NANCI activity during lung development	93.838		1-F31-HL-129683-01		26,049		26,049
Lung Transplant donor: prediction, evaluation, and mechanism	93.838		4-K23-HL-116656-04		140,171		140,171
Lung Transplant Microbiome and Chronic Allograft Dysfunction	93.838		1-R01-HL-113252-01A1		67		67
Lung Transplant Microbiome and Chronic Allograft Dysfunction	93.838		4-R01-HL-113252-04		737,616		737,616
Mechanisms of Lung Homeostasis by F box Proteins	93.838	UNIVERSITY OF PITTSBURGH	0038410(124605-1)			19,123	19,123
Mentored Patient-Oriented Research in Pulmonary Arterial Hypertension	93.838		2-K24-HL-103844-06		68,250		68,250
Methods to improve the detection of treatment effects in ARDS clinical trials	93.838		1-F31-HL-127947-01		15,358		15,358
Molecular Imaging of the Lung Using Hyperpolarized Carbon-13 Compounds	93.838		1-R01-HL-116342-01		115,509		115,509
mTOR coordinates cell metabolism, growth and survival in pulmonary hypertension	93.838	UNIVERSITY OF PITTSBURGH	0037735 (123597-1)			-1,155	-1,155
Novel Molecular Mechanisms Promote GPCR-Induced Bronchodilation in Asthma	93.838		1-P01-HL-114471-01A1	288,769	288,699		288,699
Obesity, Inflammation, and Lung Injury after Lung Transplantation	93.838	COLUMBIA UNIVERSITY	4(GG007576)			210,353	210,353
Probing the physics of chronic lung disease using microphysiological biomimicry QUANTITATIVE STRUCTURAL AND FUNCTIONAL IMAGING OF THE LUNG	93.838		1-DP2-HL-127720-01		777,484		777,484
QUANTITATIVE STRUCTURAL AND FUNCTIONAL IMAGING OF THE LUNG Regulation of Airway Morphogenesis and Differentiation by Wnt Signaling	93.838		1-R01-HL-089064-01A1		138,916 403		138,916 403
Regulation of Airway Morphogenesis and Differentiation by Wnt Signaling Regulation of Airway Morphogenesis and Differentiation by Wnt Signaling	93.838 93.838		5-R01-HL-087825-08 4-R01-HL-087825		403 304.356		403 304.356
Regulation of Airway Morphogenesis and Differentiation by Witt Signating Role of anti-Col (V) immunity in primary graft dysfunction	93.838		4-R01-HL-08/825 1-R01-HL-096845-01A1		304,356 8,562		304,356 8,562
Role of folliculin (FLCN) in lung cell survival	93.838		1-R01-HL-1096845-01A1 1-R01-HL-110551-01A1	-62	8,562 65,656		8,562 65,656
Role of Peroxiredoxin 6 in the Repair of Peroxidized Cell Membranes	93.838		2-R01-HL-102016-05A1	-02	594,170		594,170
Role of Prdx6 in the activation of NADPH oxidase	93.838		1-R01-HL-105509-01		-23,958		-23,958
Role of RAGE in Transfusion Mediated Acute Lung Injury	93.838		1-K08-HL-098362-01		201		201
Targeted Drug Delivery For Acute Respiratory Distress Syndrome	93.838		1-F32-HL-129665-01		52.089		52.089
Targeted nanomedicine for ALI and I/R	93.838		1-R01-HL-125462-01A1		551,625		551,625
Targeting novel biotherapeutics to endothelium	93.838		1-R01-HL-128398-01		581,246		581,246
The Lung DNA Virome in Health and Disease	93.838		1-R61-HL-137063-01		9.876		9,876
The role of lysophosphatidic acid signaling in lung ischemia/reperfusion injury	93.838		1 F32HL127972-01		50,600		50,600
The role of physician experience in outcomes of patients with acute respiratory failure	93.838		1-K08-HL-116771-01A1		891		891
The role of physician experience in outcomes of patients with acute respiratory failure	93.838		4-K08-HL-116771-04		154,226		154,226
THE ROLE OF TSC2 AND RHO GTPASES IN LAM	93.838		1-R01-HL-090829-01A1		-1		-1
Training in Pulmonary Immunology	93.838		2-T32-HL-007586-26		2,515		2,515

Total Expenditures on Federal Awards for Fiscal Year Ended FY2017				· 	81,484,111	884,044,342		

1. Basis of Presentation

The Schedule of Expenditures of Federal Awards (the "Schedule") has been prepared to present a summary of those activities of the University of Pennsylvania for the year ended June 30, 2017, which have been financed by the U.S. Government ("Federal awards") and is presented on the accrual basis of accounting. The information in this schedule is presented in accordance with the requirements of Title 2 U.S. *Code of Federal Relegations* Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance).

For purposes of the Schedule, Federal awards include all Federal assistance entered into directly between the University of Pennsylvania and the Federal government and sub-awards from non-Federal organizations made under federally sponsored agreements. Because the Schedule presents only a selected portion of the activities of the University of Pennsylvania, it is not intended to and does not present the financial position or the revenues, expenses or changes in net assets of the University of Pennsylvania.

The University applies its predetermined approved facilities and administrative rate when charging indirect costs to federal awards rather than the 10% de minimis cost rate as described in Section 200.414 of the Uniform Guidance.

Negative amounts on the schedule represent adjustments in the normal course of business to amounts reported in previous years. Catalog of Federal Domestic Assistance ("CFDA") and pass-through award numbers are present where available.

2. Federal Student Financial Assistance

The federal student loan programs included within the Student Financial Aid Cluster on the Schedule of Expenditures of Federal Awards above, with the exception of Federal Direct Loans, are administered directly by the University and balances and transactions relating to these programs are included in the University's consolidated financial statements. Loans outstanding at the beginning of the year and loans made during the year are included in the federal expenditures presented in the Schedule. Also included is the amount recovered for the year ended June 30, 2017, for administrative cost allowance from the Perkins Loan program of \$689,284. The amounts of Federal Loans outstanding at June 30, 2017 are shown on below.

Report of Independent Auditors on Internal Control over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance with *Government Auditing Standards*

To the Trustees of the University of Pennsylvania:

We have audited, in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States, the consolidated financial statements of the University of Pennsylvania ("the University"), which comprise the consolidated statement of financial position as of June 30, 2017, and the related statements of activities and of cash flows for the year then ended, and the related notes to the consolidated financial statements, and have issued our report thereon dated September 29, 2017.

Internal Control over Financial Reporting

In planning and performing our audit of the financial statements, we considered the University's internal control over financial reporting ("internal control") to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the University's internal control. Accordingly, we do not express an opinion on the effectiveness of the University's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the University's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

Philadelphia, Pennsylvania September 29, 2017

Pincewaterhouse Coopers LLP

Report of Independent Auditors on Compliance with Requirements That Could Have a Direct and Material Effect on Each Major Program and on Internal Control over Compliance in Accordance with the OMB Uniform Guidance

To the Trustees of the University of Pennsylvania:

Report on Compliance for Each Major Federal Program

We have audited the University of Pennsylvania's (the "University") compliance with the types of compliance requirements described in the *OMB Compliance Supplement* that could have a direct and material effect on each of the University's major federal programs for the year ended June 30, 2017. The University's major federal programs are identified in the summary of auditor's results section of the accompanying schedule of findings and questioned costs.

Management's Responsibility

Management is responsible for compliance with the federal statues, regulations and the terms and conditions of its federal awards applicable to its federal programs.

Auditors' Responsibility

Our responsibility is to express an opinion on compliance for each of the University's major federal programs based on our audit of the types of compliance requirements referred to above. We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and the audit requirements of Title 2 U.S. *Code of Federal Regulations* Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance). Those standards and the Uniform Guidance require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about the University's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances.

We believe that our audit provides a reasonable basis for our opinion on compliance for each major federal program. However, our audit does not provide a legal determination of the University's compliance.

Opinion on Each Major Federal Program

In our opinion, the University complied, in all material respects, with the types of compliance requirements referred to above that could have a direct and material effect on each of its major federal programs for the year ended June 30, 2017.

Other Matters

The results of our auditing procedures disclosed instances of noncompliance, which are required to be reported in accordance with the Uniform Guidance and which are described in the accompanying schedule

of findings and questioned costs as items 2017-002 through 2017-008. Our opinion on each major federal program is not modified with respect to these matters.

The University's response to the noncompliance findings identified in our audit is described in the accompanying Management's View and Corrective Action Plan. The University's response was not subjected to the auditing procedures applied in the audit of compliance and, accordingly, we express no opinion on the response.

Report on Internal Control over Compliance

Management of the University is responsible for establishing and maintaining effective internal control over compliance with the types of compliance requirements referred to above. In planning and performing our audit of compliance, we considered the University's internal control over compliance with the types of requirements that could have a direct and material effect on each major federal program to determine the auditing procedures that are appropriate in the circumstances for the purpose of expressing an opinion on compliance for each major federal program and to test and report on internal control over compliance in accordance with the Uniform Guidance, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly we do not express an opinion on the effectiveness of the University's internal control over compliance.

A deficiency in internal control over compliance exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a federal program on a timely basis. A material weakness in internal control over compliance is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis. A significant deficiency in internal control over compliance is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified. We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses. However, we identified a deficiency in internal control over compliance, as described in the accompanying schedule of findings and questioned costs as item 2017-001, that we consider to be a significant deficiency.

The University's response to the internal control over compliance finding identified in our audit is described in the accompanying Management's View and Corrective Action Plan. The University's response was not subjected to the auditing procedures applied in the audit of compliance and, accordingly, we express no opinion on the response.

The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal control over compliance and the results of that testing based on the requirements of the Uniform Guidance. Accordingly, this report is not suitable for any other purpose.

Section II – Financial Statement Findings

None noted.

Section III - Federal Awards Findings and Questioned Costs

Finding 2017-001 Cost Transfers

Grantor: Various

Program: Research and Development Cluster

CFDA#: Various **Title:** Various

Award Year: 07/2016 - 06/2017

Award Number: Various

Criteria

Section 200.333 of the Uniform Guidance states that — "Financial records, supporting documents, statistical records, and all other non-Federal entity records pertinent to a Federal award must be retained for a period of three years from the date of submission of the final expenditure report or, for Federal awards that are renewed quarterly or annually, from the date of the submission of the quarterly or annual financial report, respectively, as reported to the Federal awarding agency or pass-through entity in the case of a subrecipient."

Section 200.403 of the Uniform Guidance, Factors affecting allowability of costs says, "Except where otherwise authorized by statute, costs must meet the following general criteria in order to be allowable under Federal awards... (g) Be adequately documented."

DHHS Grants Policy Statement — "Permissible cost transfers should be made promptly after the error occurs but no later than 90 days following occurrence unless a longer period is approved in advance by the GMO. The transfer must be supported by documentation that fully explains how the error occurred and a certification of the correctness of the new charge by a responsible official of the recipient, subrecipient, or contractor. An explanation merely stating that the transfer was made "to correct error" or "to transfer to correct project" is not sufficient."

University Policy 2113 Cost Transfers and Payroll Reallocations states "The Principle Investigator (PI) is responsible for ensuring that transfers of cost to sponsored projects, which may represent corrections of errors, are made promptly. Transfers must be supported by documentation which contains a full explanation of the need for the transfer and a correlation of the charge to the project to which the transfer is being made. Explanations such as "to correct an error" or "to transfer to correct project" are unacceptable. Documentation of the cost transfer should be provided at the time the transfer is prepared, using the Cost Transfer Justification Form. Cost transfers must be prepared and submitted within 90 days from month end in which the transaction appears on the fund. Cost transfers made after this period require ORS approval and will only be allowed under extenuating circumstances. Cost Transfers may be made, provided the following conditions are met: a) the cost is an allowable, allocable, and reasonable charge to the project; and b) the transfer is supported by adequate documentation fully explaining the need for the transfer and certified by the principal investigator and business administrator. The documentation to support the cost transfer is detailed on the Cost Transfer Justification Form and includes, but is not limited to: a) explanation for the transfer; b) explanation of the direct benefit to the funding source; c) original source documentation (invoice, PDA form, receipt, etc.); d) PI approval."

Condition

In testing the University's conformity with the compliance requirements for cost transfers, 60 individual cost transfer entries were selected to ensure the transfers were allowable, approved, and had all required documentation at the time of transfer. The support requested for each selection included the original

invoice, journal entry detail, cost transfer justification form, and documentation at the time of transfer of Principal Investigator approval of the cost transfer, a descriptive explanation of the reason for the transfer and a correlation of the charge to the project to which the transfer was made. Of the 60 cost transfer entries tested, 12 instances were noted in which one or more of the required components of the cost transfer documentation was documented after the transfer or in which the date of PI certification could not be determined based on the supporting documentation provided.

This is a repeat of finding 2016-001 in the prior year audit report. Refer to table below for additional information on each exception noted.

Table Legend

- A Cost Transfer Justification Form was not fully completed at time of transfer, including documentation of the explanation of how the error occurred, correlation of the charge to the project to which the transfer is being made, and certification of the transfer by the Principal Investigator.
- B Certification of the transfer by the Principal Investigator on the Cost Transfer Justification Form was not dated, and therefore the timeliness of the certification could not be determined.

CFDA #	Award Number	Transfer Amount (\$)	Exception(s) Noted
93.855	1-R01-AI-122749-01	10,390	A
93.855	24971-04-324	34,685	В

93.242	1-R37-MH-108286-01	2,315	A
12.910	W911NF-13-2-0036	224,840	A
93.242	1-P50-MH-096891-01	255	A
93.242	1-R01-MH-109382-01A1	797	A
93.866	1-R01-AG-037679-01A1	6,030	В
93.847	1-R01-DK-106309-01A1	8,986	A
93.837	1-R01-HL-133080-01	2,806	A
93.859	2-R01-GM-055560-14A1	350	В
47.049	CHE-1150351	742	A

Management was able to provide some level of appropriate documentation for each cost transfer selection, although not necessarily documented at the time of transfer. The documentation received supports the allowability and appropriateness of the cost transfer for all selections.

Cause

In several instances, grant administrators were not diligent in adhering to the University's policy on maintaining complete and adequate documentation for cost transfers at the time of occurrence. The University has educated their research community on the need to complete the required cost transfer form. Additionally, while management worked to improve the cost transfer policy and documentation requirements throughout the fiscal year, the formal implementation of these improvements did not take effect until after the completion of the fiscal year under audit.

Effect

For the cost transfers identified above, there was not a clearly documented audit trail at the time of the transfer to evidence various required components of the cost transfer policy, thereby increasing the risk that costs could be transferred inappropriately to federal awards and remain undetected.

Questioned Costs

None as all cost transfers selected for testing were allowable.

Recommendation

The University should further enhance their current control process, including a formally documented review control to ensure that cost transfers are submitted with all required documentation and explanation of the transfer. The review control documentation should include a manual or electronic signature from the reviewer and date of review, evidencing the review of the submitted cost transfer documentation as in compliance with University policy and compliance requirements.

047133-01; 1-UC4-DK-112217-01

Criteria

2. CFR 200.305 (b3):

Reimbursement is the preferred method when the requirements in paragraph (b) cannot be met, when the Federal awarding agency sets a specific condition per §200.207 Specific conditions, or when the non-Federal entity requests payment by reimbursement.

Per the OMB Compliance Supplement, the non-Federal entity must disburse funds for program purposes before requesting payment from the Federal awarding agency or pass-through entity.

Condition

In testing the University's conformity with the compliance requirements for cash management, 25 individual expenditures were selected to compare the date of vendor payment from the University to the date of reimbursement from the government to the University. Of the 25 expenditures tested, eight instances were noted in which the University paid the vendor after requesting and receiving reimbursement from the government. Refer to the table below for further details.

CFDA Number	Award Number	Expenditure Amount	Date of Payment to Vendor	Date of Reimbursement from Government	Days Variance
93.847	2-U01-DK- 060990-13	\$880	3/3/2017	2/8/2017	23

93.847	1-UC4-DK- 112217-01	\$8,845	6/29/2017	6/27/2017	2

Cause

Management's current process to ensure that the reimbursement of expenditures occurs only after paying the vendor utilizes the assumption that vendors will be paid within 30 days, on average, of incurring the expense. The reliance of the 30 day average time-frame allowed certain expenditures to be included in requests for reimbursement prior to being liquidated.

Effect

The University received Federal reimbursement prior to paying the vendors for the selected expenses.

Questioned Costs

None.

Recommendation

The University should revisit existing internal control procedures to ensure expenditures are paid in compliance with the Federal reimbursement requirements. We also recommend management discuss current cash management requirements with the OMB and the University's cognizant agency to determine a solution that meets the needs of both parties.

Award Number: W911NF-13-2-0036; 5315-TUP-COP-9151; 5541-TUP-COP-9151

Criteria

 $2\ CFR$ section 200.343(b) — "Unless the Federal awarding agency or pass-through entity authorizes an extension, a non-Federal entity must liquidate all obligations incurred under the Federal award not later than 90 calendar days after the end date of the period of performance as specified in the terms and conditions of the Federal award."

Condition

In testing the University's conformity with the compliance requirements for period of availability, 25 individual expenditures within the Research and Development cluster and 5 expenditures within the SNAP Cluster were selected to ensure that the University liquidated the expenditures within 90 days after award period end. Of the 25 Research and Development Cluster expenditures tested, one instance was noted in which the University paid the vendor after 90 days after award period end. Of the five SNAP Cluster expenditures tested, one instance was noted in which the University paid the vendor after 90 days after award period end. Refer to the table below for further details.

CFDA Number	Award Number	Payment Amount	Date of Payment to Vendor	Award End Date	Days Between Award End and Payment	Days Payment Exceeded 90 Day Threshold
12.910	W911NF- 13-2-0036	\$67	4/7/2017	12/31/2016	97	7
10.561	5315-TUP- COP-9151	\$7,078	2/21/2017	9/30/2016	144	54

Cause

In both instances, management was awaiting additional invoice supporting documentation from the vendor prior to making payment.

Effect

The University was not timely in liquidating the obligations noted above.

Questioned Costs

None as all costs were allowable.

Recommendation

The University should further enhance their current award close-out process, including a detailed review of un-liquidated obligations prior to the completion of the 90-day close-out period to ensure payments have been made to the vendors in compliance with the criteria cited above. The control documentation should include a manual or electronic signature from the reviewer and date of review, specifically indicating the review that all expenditures have been liquidated as of 90 days after the award period end.

Management's View and Corrective Action PlanFollowing these findings are management's view and corrective action plan.

Finding 2017-004 Procurement

Grantor: Department of Health and Human Services, National Institutes of Health;

Department of Agriculture

Program: Research and Development Cluster; SNAP Cluster

CFDA#: 93.855; 10.561

Title: A Phase 2b/3 Double Blind Safety and Efficacy Study of Injectable Cabotegravir

Compared to Daily Oral Tenofovir Disoproxil Fumarate/Emtricitabine (TDF/FTC), For Pre-Exposure Prophylaxis in HIV-Uninfected Cisgender Men and Transgender

Women who have Sex with Men:

PA Nutrition Education TRACKS Program

Award Year: 06/2016 - 07/2017

Award Number: SUB TO UM1 AI068619; 5315-TUP-COP-9151; 5541-TUP-COP-9151

Criteria

University Policy 2308 Competitive Bidding states that, "All purchases with an aggregate value of \$5,000 or more must be competitively bid. Regardless of the dollar amount, competitive bids are not required for purchases from University Contract Suppliers and Penn Marketplace Suppliers designated as such. Normally, a minimum of three bids from qualified sources of supply will be required. However, circumstances may exist when fewer than three bids or more than three bids may be appropriate:

- a. Purchasing Services will accept fewer than three bids only in cases where the normal competitive bidding process cannot be conducted. Purchase orders for which at least three bids cannot be obtained must be accompanied a written Request to Waive the Competitive Bidding Process, in which the circumstances are explained.
- b. Purchasing Services is authorized to determine when more than three bids will be required."

University Policy 2112 Procurement of Goods and Services states that "The University of Pennsylvania elects to utilize the grace period for compliance with the procurement standards under OMB Uniform Guidance Part 200.320."

Circular A-110 subpart C — Post-Award Requirements section .44 part (e) notes the following: "Recipients shall, on request, make available for the Federal awarding agency, pre-award review and procurement documents, such as request for proposals or invitations for bids, independent cost estimates, etc., when any of the following conditions apply.

- (1) A recipient's procurement procedures or operation fails to comply with the procurement standards in the Federal awarding agency's implementation of this Circular.
- (2) The procurement is expected to exceed the small purchase threshold fixed at 41 U.S.C. 403 (11) (currently \$25,000) and is to be awarded without competition or only one bid or offer is received in response to a solicitation.
- (3) The procurement, which is expected to exceed the small purchase threshold, specifies a "brand name" product.
- (4) The proposed award over the small purchase threshold is to be awarded to other than the apparent low bidder under a sealed bid procurement.
- (5) A proposed contract modification changes the scope of a contract or increases the contract amount by more than the amount of the small purchase threshold.

Condition

In testing the University's conformity with the compliance requirements for procurement, we selected 25 Research and Development (R&D) purchases and three Supplemental Nutrition Assistance Program (SNAP) purchases and noted two selections that did not have documentation of competitive bidding or a sole source justification prior to purchase. Refer to the table on the following page for further details.

CFDA#	Award #	Purchase Order #	Purchase Order Amount (\$)
93.855	SUB TO UM1 AI068619	3695351	\$30,000
10.561	5315-TUP-COP-9151	3603916	\$5,450

This is a repeat of finding 2016-004 in the prior year audit report

Cause

The sole source justification for the approved Purchase Orders was not adequately documented at the time due to confusion over the policy requirements.

Effect

The documentation does not comply with the University's procurement policy. Additionally, items purchased with federal funds may be at increased risk for purchase at a higher rate if the University is not evaluating competitive bids.

Questioned costs

None

Recommendation

The University should enhance their current process of ensuring competitive bidding or sole source justification is documented before purchase, including a more detailed review of the procurement documentation by the Business Administrator or Principal Investigator prior to approving the purchase on the Federal fund. The control documentation should include a manual or electronic signature from the reviewer and date of review, specifically indicating the review and approval that satisfactory evidence of competitive bidding or sole source justification has been included in the award file. Additionally, management should further enhance their process by implementing a periodic review control to ensure that purchases made on Federal funds have required procurement documentation, as necessary.

Management's View and Corrective Action Plan

Findings 2017-005 through 2017-007 are additional findings included in the report based upon the results of the audit of the University of Pennsylvania's City of Philadelphia Awards. As these programs include Federal funding, these findings have also been included within this report.

Finding 2017-005 Eligibility

Grantor: Department of Health and Human Services, Pass-through City of Philadelphia, Aids

Activity Coordinating Office (AACO)

Program: Ryan White HIV/AIDS

CFDA: 93.914

Title: HIV Emergency Relief Project Grants

Award Year: 2016-2017; 2017-2018

Award Number: RM6757, R7868, RS6944, R7944, R6866, R7866, R6965, R7965, RW6731, and

RW7731

Criteria

Per the AACO/PA Dept. of Health Ryan White Part A/B – Payer of Last Resort Client Certification Form Instructions, "The certification process must begin for all clients upon initial intake for services and final Eligibility is determined once all supporting documentation has been received and verified. The City of Philadelphia Audit Guide section 6130.04 provides a list of documents to be maintained and states "case management service providers are required to keep a file on each client served".

Additionally, per the Universal Monitoring Standards set forth by the Health Resources and Services Administration (HRSA) of the Department of Health and Human Services, the Ryan White HIV/AIDS Program Part A and B Monitoring Standards require service providers who receive Ryan White funding to screen to certify their eligibility for Ryan White-funded services. The guidance states that documentation of eligibility determination is required in client records, as evidenced by copies of documents.

Finally, per 42 USC 300ff-15, providers may impose charges for the provision of services to patients in accordance with the individual's income level not exceeding in aggregate specific thresholds based on the individual's income level. The term aggregate applies to the annual charges imposed for all charges without regard to whether they are characterized as enrollment fees, premiums, deductibles, cost sharing, co-payments, coinsurance, or other charges for services.

Condition

Health Resources and Services Administration of the Department of Health and Human Services standards require service providers who receive Ryan White funding to screen clients and collect certain documentation to support their determination of eligibility for Ryan White funded services, including an HIV positive diagnosis, identity, residence, insurance status, and income level. These requirements were sent to the University of Pennsylvania ("the University") by the City of Philadelphia as part of its contract to provide services.

Additionally, in cases in which the service provider charges individuals for service performed under the Ryan White program, the service provider is required to ensure that the aggregate amount of charges for the year do not exceed the income level related thresholds within the criteria below.

For the AACO Medical awards, of the 60 patient files selected for eligibility testing, 7 patients did not have all the required eligibility documentation for the Ryan White program. For the AACO Dental awards, of the 40 patient files selected for testing, 1 patient did not have all the required eligibility documentation for the Ryan White program. This is a repeat of finding 2016-005 in the prior year audit report.

Additionally, 60 AACO Medical patient files were tested for program income testing, and 1 of these individuals had co-payments charged, totaling \$50. For this one transaction, it was unable to be

determined whether the institution met the program income billing criteria stated below. This is a repeat of finding 2016-005 in the prior year audit report.

The following table provides more detail for each of the exceptions noted above.

Exception	Medical/Dental	Location	Co-Payment	Exceptions
			Made	Noted
1	Medical	Presbyterian Medical Center		A
2	Medical	Presbyterian Medical Center		A
3	Medical	Presbyterian Medical Center		A, B
4	Medical	Presbyterian Medical Center		В
5	Medical	Presbyterian Medical Center		C
6	Medical	Presbyterian Medical Center	\$50	A, B, D
7	Medical	J. Edwin Wood Clinic		A
8	Dental	Dental School of Medicine		C

- A Missing evidence of eligibility determination
- **B** Missing evidence of income verification for eligibility determination
- **C** Missing evidence of personal identification for eligibility determination
- **D** Missing evidence of income level for income level threshold determination

Cause

The system management has in place to properly identify and certify individuals who are part of the Ryan White Program, in order to ensure that all eligibility documentation is obtained and retained in the patient's file, is not consistently adhered to due to staff turnover.

Additionally, the process currently in place to ensure that each Ryan White designated patient is not charged more than the allowable amount based on their income level is not consistently adhered to obtain the individual's income information prior to billing.

Effect

Patient care may be provided to ineligible patients and uninsured/underinsured patients may have been inappropriately billed for services provided.

Questioned Costs

None

Recommendation

The University should continue to ensure proper documentation is retained supporting all eligibility requirements. Management should implement preventative controls to ensure that prior to each patient visit, all eligibility documentation has been obtained. Management should also implement a periodic review control to detect any patients who are missing eligibility documentation and work to obtain the missing documentation. Finally, the AACO programs should implement a process to ensure each patient's income verification is collected and retained and should implement a process to certify that each patient is not overcharged for services received throughout the year.

Management's View and Corrective Action Plan

Finding 2017-006 Matching

Grantor: Department of Education, Pass-through City of Philadelphia, School District of

Philadelphia

Program: Gaining Early Awareness and Readiness for Undergraduate Programs (GEAR UP)

Title: GEAR UP College Readiness Collaborative Communities Project

CFDA: 84.334 **Award Year:** 2015-2016

Award Number: 005A/F16 (362/F16)

Criteria

34 CFR 694.7(a) — "In order to be eligible for GEAR UP funding... a grantee must make substantial progress towards meeting the matching percentage stated in its approved application for each year of the project period. The non-Federal share of the cost of the GEAR UP project must be not less than 50 percent of the total cost of the project (i.e. one dollar of non-Federal contributions for every one dollar of Federal funds obligated for the project) over the project period."

Condition

Award 005A/F16 (362/F16) closed September 2016 and had \$74,426 in cumulative expenditures as of year-end. The University matched \$33,529, and therefore the required match of \$374,279, as communicated by the School District of Philadelphia, was not met.

Cause

The University believed the responsibility of the match requirements to belong to the prime recipient of the federal award, the School District of Philadelphia, and that such responsibility was not clearly delineated in the sub-award agreement. The University had verbal, undocumented, conversations with the School District of Philadelphia about the requirements and was communicated by the District that the District would ensure the federally required match was made, and that the University did not need to meet the federally required match level, as cited above. Subsequently, the District clarified with the University that the University was responsible for the match of \$374,279, as documented in the Partner Identification Form and Cost Share Worksheet between the University and the District.

Effect

The required match per the condition cited above is not being met by the University as a subrecipient of the federal award.

Questioned Costs

None

Recommendation

We recommend that management clarify in writing with the District the match requirements for each year of the GEAR-UP awards going forward. Additionally, we recommend that the University enhance their process of monitoring the expenditures applied to the award throughout the award year and implement a secondary level of review to ensure the required match, as confirmed by the District, is being met prior to the end of each award year.

Management's View and Corrective Action Plan

Finding 2017-007 Cash Management

Grantor: Department of Education, Pass-through City of Philadelphia, School District of

Philadelphia

Program: Gaining Early Awareness and Readiness for Undergraduate Programs (GEAR UP)

Title: GEAR UP College Readiness Collaborative Communities Project

CFDA: 84.334 **Award Year:** 2015-2016

Award Number: 005A/F16 (362/F16)

Criteria

Award agreement – "The Contractor shall submit its final invoice not later than thirty (30) business days after the last day of the term."

School District Standard Terms and Conditions, included in grant agreement — "If the Contractor, after a request by the School District, does not provide evidence satisfactory to the School District to support any items or items set forth on an invoice, the School District shall have no liability to make any payment with respect to that item or items. If the School District has already made payment for that item or items, the School District may by notice to the Contractor require the Contractor to refund to the School District the amount of any such overpayment, or the School District, at its option, may set off such overpayment against any payments accruing thereafter to the Contractor under this Contract or any other contract between the Parties."

Condition

Award 005A/F16 (362/F16) closed September 2016 and the final invoice was rendered for a cumulative amount of \$81,747. Subsequently, compensation, employee benefits, subcontractor expenses, and associated indirect costs were reversed off of the award in the amount of \$7,321. As the University was reimbursed for these expenditures in December 2016, a return of funds and updated invoice is required to be submitted to the School District of Philadelphia.

Cause

The award closeout process in place lacks adequate detective controls to ensure that late reversals of expenditures on awards with manual invoicing are identified in a timely manner for updated invoicing and return of funds to the sponsor.

Effect

The School District of Philadelphia is owed a refund for overpayment made to the University.

Questioned Costs

\$7,321

Recommendation

We recommend that the University enhance their controls related to award close out to ensure that any late credits are reviewed, funds are closed timely, and, if necessary, excess funds are returned to the sponsor timely.

Management's View and Corrective Action Plan

Although the Student Financial Aid Cluster was not selected as a major program, instances of non-compliance were noted and therefore, reported as required.

Finding 2017-008 Return of Title IV Funds

Grantor: Department of Education **Program:** Student Financial Aid **CFDA:** 84.063, 84.268

Title: Federal Pell Grant, Federal Direct Loans

Award Year: 7/2016 - 6/2017

Award Number: P063P162158, P268K172158

Criteria

In accordance with 34 CFR 668.22 the University must return the amount of Title IV funds for which it is responsible as soon as possible but no later than 45 days after the date of the institution's determination that the student withdrew.

Condition

Of the 20 refund calculations tested, we noted that for 2 students the return of funds to the government occurred untimely. This is a repeat of finding 2016-008 in the prior year audit report. Refer to the table below for further details.

#	Semester of Leave	Date of Determination of Withdrawal	Date Funds Returned	Days to Return Funds	Days Late	Aid Type Returned	Amount Returned
1	Spring 2017	2/20/2017	4/22/2017	61	16	Unsub	13,732
						Direct Loan	
2	Fall 2016	11/2/2016	1/9/2017	68	23	Pell Grant	2,135

Cause

While management made enhancements to the return of Title Iv funds control processes to address the accuracy of the calculation and the timeliness of the returns during fiscal year 2017 in response to the 2016 audit finding, there were exceptions regarding the timeliness of returning Title IV funds during the fiscal year.

Effect

Late refunds of the Title IV funds to the government occurred.

Questioned Costs

None.

Recommendation

Management should further enhance their control process to ensure that all refunds are submitted to the government within the 45 day threshold.

Management's View and Corrective Action Plan

Finding 2016-001 Cost Transfers, 2015-003 Cost Transfers, 2014-002 Cost Transfers, 2013-004 Cost Transfers

Grantor: Various

Program: Research and Development Cluster

CFDA#: Various **Title:** Various

Award Year: 07/2015 - 06/2016

Award Number: Various

Summary

For 60 R&D cost transfer selections, PwC requested the original invoice, evidence of original invoice approval, journal entry detail, evidence of Principal Investigator approval of the cost transfer, copy of the original or amended grant budget with identification of the cost transfer budget category and documentation at the time of transfer of a descriptive explanation of the reason for the transfer and a correlation of the charge to the project to which the transfer was made. We also requested the cost transfer form for all transfers made after the implementation of the new policy in April 2016. It was noted for 35 of the 60 selections that the University's cost transfer policy was not fulfilled by the support provided. Management was able to provide some level of appropriate documentation for each cost transfer selection, although not necessarily documented at the time of transfer.

Status Update

Towards the end of FY16, the University implemented the use of a new, standardized Cost Transfer Justification Form to help address the repeated Cost Transfer audit findings. As a result of the FY16 audit the University further strengthened and improved controls over cost transfers by implementing a multifaceted plan. First, a Research Shared Governance Board was established with representation across Schools and Centers to actively engage, communicate, train on research matters, as well as help establish best practices for research policy implementation. Currently, the Board meets monthly and provides both a forum for discussing research compliance and policy issues as well as a resource for improving practices and procedures. Secondly, through this Board, research administration management has been able to more actively engage and involve School and Center leadership in process improvement and accountability. Thirdly, the University revised its Cost Transfer policy, training and procedures in an effort to improve compliance with Federal Rules and Guidelines. This new policy was released July 2017 and will be applicable to cost transfers beginning in FY2018. In conjunction with the new policy, revised electronic procedures for manual journal entries on sponsored projects were implemented beginning September 2017 in order to improve the timeliness of cost transfer documentation, such that copies of Cost Transfer Justification Forms no longer need to be collected or emailed to a central repository. Lastly, a cost transfer controls review and monitoring process was designed through the Research Shared Governance Board, which is currently being implemented during Q2 of the fiscal year 2018. Please see the current year finding 2017-001 and Management's View and Corrective Action Plan for more information.

Finding 2016-002 Equipment Management, 2015-004 Equipment Management

Grantor: National Institute of Health

Program: Research and Development Cluster

CFDA#: 93.859, 93.279

Title: Ras signaling and tubulogenesis in the C. elegans excretory (renal) system, Integrated

Interdisciplinary Training in Computational Neuroscience

Award Year: 06/2015-07/2016

Award Number: 2-R01-GM-058540-01A1, 5-R90-DA023424-05

Summary

From a sample of 40 pieces of equipment partially or fully purchased with Federal funds selected for testing, two equipment inventory items were not retired on a timely basis. One piece of equipment with a net book value of \$3,102 as of June 30, 2016 was replaced without being updated in the University's system, while one piece of equipment with a net book value of \$0 as of June 30, 2016 was decommissioned in 2015 but not updated in the University's system. In each case, the equipment stopped working prematurely and the system records were not updated to reflect its discontinued use.

Status Update

The University established the Research Shared Governance Board as a forum in which to actively communicate, train and engage the community on research policies, trainings and best practices. The requirement for timely reporting of equipment disposals and documentation was emphasized and recommunicated through the Research Shared Governance Board. Additionally, inventory procedures were revised to increase the frequency for sponsored equipment observation from every two years to every year.

Finding 2016-003 Subrecipient Monitoring

Grantor: Department of Defense, National Institute of Health

Program: Research and Development Cluster

CFDA#: 12.300

Title: SPARCS: Synthesis of Platform-Weve Attache-Resilient Control Systems; New

Paradigms for Scalable Online Decentralized Optimization;

Award Year: 06/2015-07/2016

Award Number: FA8760-12-2-0247, N00014-12-1-0997

Summary

From a sample of 25 R&D subrecipient invoices selected for testing, 2 invoices did not have documentation demonstrating Principal Investigator (PI) approval, as is required per University policy.

Status Update

In January 2017, the business unit managing the awards was reminded of the need to document PI approval for sub-recipient invoices, and the business unit is now retaining written documentation of such PI approvals.

Finding 2016-004 Procurement

Grantor: National Institute of Aging of National Institutes of Health

Program: Research and Development Cluster

CFDA#: 93.866

Title: The NIA Genetics of Alzheimer's Disease Data Storage Site

Award Year: 06/2015 - 07/2016 **Award Number:** 1-U24-AG-041689-01

Summary

During testing of procurement compliance requirements, 25 Research and Development (R&D) purchases greater than \$25,000 were selected, and it was noted that two selections that were not from a Penn Marketplace Supplier and did not have contemporaneous documentation at the time of purchase as to the reasons these vendors were sole source providers and therefore, why no competitive bids were necessary. The documentation to support the approved Purchase Orders was not adequately retained.

Status Update

Since the finding in January 2017, the Purchasing Services staff received reinforced training for Purchase Order approvals and documentation. Although Penn received a repeat finding for FY17 in the area of

Procurement, we note that the 2 POs in the finding were from before the corrective action plan of the FY2016 audit report was implemented. See current year finding 2017-004.

The following prior year audit findings are additional findings included in the PwC report based upon the results of PwC's audit of the University of Pennsylvania's City of Philadelphia Awards. As these programs include Federal monies, these findings have also been included within this report.

Finding 2016-005 Eligibility, 2015-005 Eligibility, 2014-005 Eligibility, 2013-006 Eligibility

Grantor: Department of Health and Human Services, Pass-through City of Philadelphia,

Aids Activity Coordinating Office (AACO)

Program: Ryan White HIV/AIDS

CFDA: 93.914

Title: HIV Emergency Relief Project Grants

Award Year: 2015-2016; 2016-2017

Award Number: RM5757 and R5731; RM6757 and R6731

Summary

Health Resources and Services Administration of the Department of Health and Human Services standards require service providers who receive Ryan White funding to screen clients and collect certain documentation to support their determination of eligibility for Ryan White funded services, including an HIV positive diagnosis, identity, residence, insurance status, and income level. For the AACO Medical awards, of the 60 patient files selected for eligibility testing, 14 patients did not have all the required eligibility documentation for the Ryan White program. For the AACO Dental awards, of the 25 patient files selected for testing, 2 patients did not have all the required eligibility documentation for the Ryan White program.

Additionally, in cases in which the service provider charges individuals for service performed under the Ryan White program, the service provider is required to ensure that the aggregate amount of charges for the year do not exceed specific thresholds based on the individual's income level. Of the 60 AACO Medical 60 patient files testing for eligibility, 55 were leveraged for program income testing, and 7 of these individuals had co-payments charged, totaling \$263. For all 7 transactions, it was unable to be determined whether the institution met the program income billing criteria stated below.

Status Update

Over the past year, most of the UPHS clinics implemented a streamlined approach to certification documentation resulting in electronic certification cards. This process has assisted the staff responsible for certifying eligible patients and improved the file documentation to support such certifications. While this improvement in addition to further emphasis on the need for compliance in the area of eligibility has helped to reduce the number and scope of audit findings for FY17 over FY16, we recognize that it was not perfect as it was implemented part way through the year and staff were transitioning to the new process. We are working to further improve and refine our process. See the current year finding 2017-005 and the associated Management's View and Corrective Action Plan for further information.

Finding 2016-006 Employee Fringe Benefits

Grantor: Department of Health and Human Services, Pass-through City of Philadelphia,

Office of Behavioral Health and Intellectual Disability Services

Program: Mental Health

CFDA: 93.667

Title: Mental Health Base Unitary

Award Year: 2015-2016 **Award Number:** 12-20104-03

Summary

Per review of the total salary amounts and fringe benefit amounts charged to the Mental Health award 12-20104-03, during Fiscal Year 2016, the fringe benefit rate of 34.06% applied to the award for the Social Rehabilitation Program and the 32.79% applied to the award for the Transitional and Community Integration Services Program, were higher than the federal allowable rate of 32.20% per the University's Department of Health and Human Services ("DHHS") negotiated fringe benefit rate agreement in effect during Fiscal Year 2016. Total questioned costs of \$4,859, equaled the difference between the actual fringe benefits charged and the cost of fringe benefits recalculated using the DHHS negotiated fringe benefit rate of 32.20%.

Status Update

As committed to in the Correction Action Plan last year, Hall Mercer updated its procedures to reflect only up to the Federal % for allowable fringe benefit costs from FY17 and on, since the city agency does not finalize its determination of federal flow thru funding under the unitary contract until the after the award year ends. As these costs represented a portion of the unfunded program costs, no refunds were required.

Finding 2016-007 Unallowable Costs

Grantor: Department of Health and Human Services, Pass-through City of Philadelphia,

Office of Behavioral Health and Intellectual disability Services

Program: Mental Health

CFDA: 93.667

Title: Mental Health Base Unitary

Award Year: 2015-2016 **Award Number:** 12-20104-03

Summary

The Mental Health awards have a one year duration beginning July 1st each year. During testing over the period of availability, one invoice, totaling \$541, was charged to the award for service dates prior to the start of the 2015-2016 grant. The invoice was related to gas for vehicles used during the month of June 2015. As these expenses were related to the period prior to the start of the current award, they were outside the grant's period of availability. Furthermore, during testing of 17 selections for allowability of direct costs, there were four monthly telephone expenditures totaling \$796 for which management was unable to provide the supporting documentation, such as purchase orders or invoices, necessary to validate the existence and allowability of the charges.

Status Update

Program financial management was reminded to specifically review costs incurred around award begin and end dates to ensure costs are charged to the proper period, and are properly documented. As these costs represented a portion of the unfunded program costs, no refunds were required.

Finding 2016-008 Return of Title IV Funds

Grantor: Department of Education **Program:** Student Financial Aid **CFDA:** 84.007, 84.063, 84.268

Title: Federal SEOG, Pell Loan, Federal Direct Loans

Award Year: 7/2015 - 6/2016

Award Number: Various

Summary

Of the 25 refund calculations tested, it was noted for 10 students that the refund amount was calculated incorrectly or the return of funds occurred untimely. The incorrect calculations either used the wrong number of days in the semester of the wrong student withdrawal date, which led to over or under refunds to the Direct Loan, Pell Grant, and Supplemental Educational Opportunity Grant (SEOG) programs in addition to certain students being over or under refunded. There were 7 late returns ranging from 4 to 208 days late with an average of 90 days past the 45 day timeframe to return funds. Additionally 3 selections totaling \$5,208 showed the funds were not returned to the Department of Education as of the end of the University's fiscal year. Finally, one fund had funds returned in the incorrect order.

Status Update

Management has determined the need for a Compliance Director in the Student Financial Services operation. This position was filled summer 2017. One of the many responsibilities of this role is to manage and provide oversight of the Return to Title IV (R2T4) process. The following steps are being put in place.

- To ensure accuracy and consistency of the R2T4 calculation, we have documented our policy and procedures, which includes how to complete a Return of Title IV Calculation worksheet.
- We have prepared written specifications for our systems support staff to properly identify potential students throughout our various systems. (Collaboration between Student Systems Support, ISC and Registrar).
- A system-generated report from our Records System, which highlights students who have withdrawn, taken a leave of absence, dropped classes, or graduated will be available effective spring 2018.
- Timeliness of returns will be addressed by weekly review of the enrollment report, determination of Return of Title IV funds required, performing calculation or revised calculation. (Spring 2018) Collaborating with Student Accounts and the Schools to appropriately adjusting the student's account, returning federal funds and notifying the student regarding disposition of their federal financial aid.
- Timeliness is also being addressed by communication and training with school administration on the definition and use of an Unofficial Withdrawal and Last Day of Attendance. We are working with the schools through our Undergraduate Working Group (UGWG) and Associate Deans. DRAFT Unofficial Withdrawal Policy: "An unofficial withdrawal occurs when a student does not successfully complete any of their courses, stops attending classes, and does not complete any of the coursework as of the 60% point of the semester or term without officially withdrawing from the university, as required. Students who never attended any of their classes and did not complete any coursework are required to repay 100% of the financial aid received for the semester or term."
- Implementation of the FAA Access to CPS Online software to Calculate and manage the return of Title IV funds, scheduled for the end of spring 2018.

Office of Research Services

Management View and Corrective Action Plan

Two different Management Views and Corrective Action Plans are being provided in response to the findings due to the fact that awards under Finding 2017-005 are under two different responsibility centers.

Finding 2017-001 Cost Transfers

Grantor: Various

Program: Research and Development Cluster

CFDA#: Various **Title:** Various

Award Year: 07/2016 – 06/2017

Award Number: Various

We note a significant reduction in the number of cost transfer exceptions in FY17 compared to previous years. Additionally, the positive effects of our re-education and monitoring efforts throughout last year resulted in only 1 cost transfer exception from the last quarter of FY17. We expect even more progress with compliance in FY18 with the policy and process revisions we implemented.

The University of Pennsylvania has been actively working to implement process improvements for the documentation of cost transfers. Monitoring the use of the Cost Transfer Justification Form led to recognition that there was still a need to improve the timeliness of the documentation. Following the 2016 finding, the Research Shared Governance Board was formed with representation from across the University to support research compliance. In consultation with this board, a cost transfer policy and process review was initiated. As a result, a significant cost transfer policy revision has already been enacted as of July 2017 to take effect beginning with fiscal year 2018. In conjunction with the policy revisions, in September 2017, the university updated the financial system to implement collection of information supporting the cost transfer including 1) the need for the transfer and 2) the correlation to the project at the time the journal entry is made, thereby eliminating the need for a separately documented, manual form. Additionally, all individuals authorized to perform cost transfer journal entries were required to complete new training. We believe these major changes will improve the university's compliance with the federal documentation requirements regarding cost transfers.

Finding 2017-002 Cash Management

Grantor: Department of Health and Human Services, National Institute of Health

Program: Research and Development Cluster

CFDA#: 93.847; 93.397; 93.866

Title: Continuation of the Chronic Renal Insufficiency Cohort (CRIC) Study;

Abramson Cancer Center Support Grant; Alzheimer's Disease Genetics Consortium;

Consortium for Alzheimers Sequence Analysis (CASA)

Penn Integrated Human Pancreas Procurement and Analysis Program

Award Year: 07/2016 - 06/2017

Award Number: 2-U01-DK-060990-13; 2-P30-CA-016520-40; 5-U01-AG-032984-07; 1-

UF1-AG-047133-01; 1-UC4-DK-112217-01

The University is currently following and believes it is in compliance with the cash management regulations as written in 2 CFR Part 200.305(b) which require the organization to minimize the time lapse between request for reimbursement from sponsoring agencies and vendor payment.

We understand that variations remain in the interpretation of the cash management compliance requirement. For example, on October 20, 2017, the Council On Governmental Relations (COGR) wrote a letter to the Office of Financial Management expressing concern that the cash management requirement language in the 2017 Compliance Supplement was not aligned with the requirements for cash management as currently written in 2 CFR Part 200.305(b). COGR's position is that the Compliance Supplement should be revised to conform with the cash management requirements as written in 2 CFR 200.305(b). The University agrees with COGR's position and believes the language in the Compliance supplement leads to an unrealistic and unreasonable administrative burden for universities and possibly a reconfiguration of smoothly running electronic process or a complete replacement of electronic processes with an inefficient, manual one in efforts to ensure each vendor has been paid prior to requesting reimbursement from the sponsoring agency.

The University will continue to monitor the OMB interpretation of the Cash Management requirements. If there is no resolution by OMB or change to the requirement in the Compliance Supplement we will work with our cognizant agency to arrive at a solution that fits the interests of all parties.

Finding 2017-003 Period of Availability

Grantor: Department of Defense, Advanced Research Projects Agency;

Department of Agriculture

Program: Research and Development Cluster; SNAP Cluster

CFDA#: 12.910; 10.561

Title: Rapid Ab Isolation and Delivery by Recombinant AAV Technology (RAID-

RAT)

PA Nutrition Education TRACKS Program

Award Year: 07/2016 – 06/2017

Award Number: W911NF-13-2-0036; 5315-TUP-COP-9151

At the time of closeout, the managing departments were aware of the uninvoiced amounts for the services received. However, the actual payment of such invoices occurred after the 90-day closeout period due to vendor issues which delayed the submission of such invoices to the university. It is not the university's practice to pay a vendor without a proper invoice.

Finding 2017-004 Procurement

Grantor: Department of Health and Human Services, National Institutes of Health;

Department of Agriculture

Program: Research and Development Cluster; SNAP Cluster

CFDA#: 93.855; 10.561

Title: A Phase 2b/3 Double Blind Safety and Efficacy Study of Injectable

Cabotegravir Compared to Daily Oral Tenofovir Disoproxil

Fumarate/Emtricitabine (TDF/FTC), For Pre-Exposure Prophylaxis in HIV-Uninfected Cisgender Men and Transgender Women who have Sex

with Men;

PA Nutrition Education TRACKS Program

Award Year: 06/2016 - 07/2017

Award Number: SUB TO UM1 AI068619; 5315-TUP-COP-9151

While this is a repeat finding from prior year, we note that these two exceptions occurred prior to the corrective action plan implemented by Purchasing Services in response to last year's finding. Therefore no further action is necessary.

Finding 2017-005 Eligibility - Dental

Grantor: Department of Health and Human Services, Pass-through City of

Philadelphia, Aids Activity Coordinating Office (AACO)

Program: Ryan White HIV/AIDS

CFDA: 93.914

Title: HIV Emergency Relief Project Grants

Award Year: 2016-2017; 2017-2018

Award Number: RM6757, R7868, RS6944, R7944, R6866, R7866, R6965, R7965,

RW6731, and RW7731

Although, this is a repeat finding for the AACO Dental program, we note significant improvement demonstrated by the fact that last year, 2 of 25 tested selections resulted in exceptions, but this year only 1 of 40 tested selections did so.

The exception this year is for one patient file missing documented proof of identification. In this situation, the patient was certified as Ryan White eligible, but documentation of identification was not retained. The patient file and history reveal that since the initial August 2016 visit, this patient never returned to the clinic. Therefore, clinic staff were unable to obtain the missing documentation, as would have been the normal follow-up procedure for missing patient file documentation. This patient visit was covered by insurance, therefore not considered a part of the under-insured or uninsured population supported directly by the Ryan White grant funds.

Under the AACO Dental program, the clinic staff conscientiously work to ensure that eligible patients complete Ryan White certification in a timely manner, receive the needed services and provide the required documentation, per the aims of the award.

Finding 2017-006 Matching

Grantor: Department of Education, Pass-through City of Philadelphia, School

District of Philadelphia

Program: Gaining Early Awareness and Readiness for Undergraduate Programs

(GEAR UP)

Title: GEAR UP College Readiness Collaborative Communities Project

CFDA: 84.334 **Award Year:** 2015-2016

Award Number: 005A/F16 (362/F16)

For the future, we will make more timely attempts to obtain documented clarification of

expectations and responsibilities from the prime recipient where requirements may be unclear and/or obtain written approval for matching amounts less than what was required.

Finding 2017-007 Cash Management

Grantor: Department of Education, Pass-through City of Philadelphia, School

District of Philadelphia

Program: Gaining Early Awareness and Readiness for Undergraduate Programs

(GEAR UP)

Title: GEAR UP College Readiness Collaborative Communities Project

CFDA: 84.334 **Award Year:** 2015-2016

Award Number: 005A/F16 (362/F16)

After the final invoice was sent, when it became apparent that effort had been moved from the award to the matching fund and after one of our subrecipients returned funds back to us, the department managing this award had identified the need for possible refunds and was in communication with the Office of Research Services on the issue during FY17. However, the refund was not finalized in a timely manner, but was issued back to the School District of Philadelphia in November 2017.

Finding 2017-005 Eligibility - Medical

Grantor:

Department of Health and Human Services, Pass-through City of Philadelphia, Aids

Activity Coordinating Office (AACO)

Program:

Ryan White HIV/AIDS

Title:

HIV Emergency Relief Project Grants

CFDA:

93.914

Award Year:

2016-2017; 2017-2018

Award Number: RM6757, R7868, RS6944, RS7944, R6866, R7866, R6965, R7965

Effort has been undertaken to address repeat eligibility findings on the annual audit. In addition to changes made last year to be proactive around documentation, for FY18 we have also added additional resources to our team to focus on screening for eligibility. Of note, eligibility is often noted elsewhere in the chart and working to streamline this is being undertaken. A team of capable professionals are reviewing client's individual needs and addressing eligibility at the same time with an electronic eligibility card. Also in addition to our case managers, social workers, program managers, and front desk staff, we have added a financial counselor for FY18 to review eligibility and improve compliance with required sliding fee delineation. The sliding fee schedule and an electronic process to identify and document those for whom it applies is being worked on with UPHS IT, billing, and practice management. We are now in the final stages of creating a firm workflow to be sure we are in compliance. Working to automate and document eligibility and income rules will be key to our future success.

Management's View and Corrective Action Plan

Finding 2017-008 Return of Title IV Funds

Grantor: Department of Education Student Financial Aid **Program:**

CFDA: 84.063, 84.268

Title: Federal Pell Grant, Federal Direct Loans

Award Year: 7/2016 - 6/2017

P063P162158, P268K172158 **Award Number:**

As noted in the prior year status update Management has enhanced quality control process, by hiring a Compliance Director in the Student Financial Services operation. This position was filled summer 2017. One of the many responsibilities of this role is to manage and provide oversight of the Return to Title IV (R2T4) process. The following steps are being put in place.

- To ensure accuracy and consistency of the R2T4 calculation, we have documented our policy and procedures, which includes how to complete a Return of Title IV Calculation worksheet.
- We have prepared written specifications for our systems support staff to properly identify potential students throughout our various systems. (Collaboration between Student Systems Support, Information Systems and Computing and Registrar).
- A system-generated report from our Records System, which highlights students who have withdrawn, taken a leave of absence, dropped classes, or graduated will be available effective spring 2018.

We understand there were two exceptions discovered in the 16-17 aid year testing, we have implemented the following enhanced processes to ensure that return of funds will occur within the 45 day requirement.

- Timeliness of returns will be addressed by weekly review of the enrollment report, determination of Return of Title IV funds required, performing a calculation or a revised calculation (spring 2018), collaborating with Student Accounts and the Schools to appropriately adjusting the student's account, and returning federal funds and notifying the student regarding disposition of their federal financial aid.
- Timeliness is also being addressed by communication and training with school administration on the definition and use of an Unofficial Withdrawal and Last Day of Attendance. We are working with the schools through our Undergraduate Working Group (UGWG) and Associate Deans.
 - Implementation of the Financial Aid Administrator (FAA) Access to CPS Online software to calculate and manage the return of Title IV funds, scheduled for the end of spring 2018.

Additional oversight by the Compliance Director as well as changes to be implemented in Spring 2018 will further strengthen the current control environment.

Elaine P. Varas

Senior University Director of Student Financial Aid
